BERRY SEED COMPANY

34th Season—Established 1895

CLARINDA, IOWA

Nov. 23, 1923.
Gentlemen: I want to express my pleasure and satisfaction with my seed business with you people for the past ten years. I buy annually \$500 to \$1,000 and my continued patronage speaks for itself. Your grass seeds excel in purity and high germination. Your prompt, kind, courteous treatment has made me your annual repeater for years. Good bye and good luck.
D. C. Shuler,
Parkersburg, Iowa

Nov. 22, 1923.
My Dear Sirs: Having bought several thousand dollars worth of seed from the Berry Seed Company in the past few years, have always found them prompt, strictly straight and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination that gave entire satisfaction all around.
Very respectfully,
D. W. Harris,
Green Fork, Ind.

Nov. 19, 1923.
Dear Sirs: We buy seeds for our farms from Berry Seed Co.; some years the bill runs over \$1,000.00. The quality of the seed holds us as a customer then, to the price is always less.
Yours truly,
Raymond C. Langan,
Clinton, Iowa.

BERRY

SEED COMPANY

The keystone
of Better Seeds
Lower Prices
Bigger Crops
Greater Farm PROFITS

J. F. Sinn, president and manager, is a Page county product. Born and raised on the farm, associating himself with the Berry Seed Co. the year they incorporated, in 1905. He is a great friend of the farmer and has built up this wonderful business by giving the farmers the biggest values obtainable in the seed line. He is ever at your service, answering thousands of letters, quoting special prices and giving information on farm crops. Mr. Sinn announces the morning program at 6:30 and makes many practical seed talks.

Others Join Our Anniversary Sale

Three well-known national advertisers have pages in our catalog. We want you to investigate their propositions. We will guarantee that each is reliable and they will give you the best treatment and satisfaction.

The President's GUARANTEE

AND ANNIVERSARY INVITATION

I want everyone receiving this Anniversary Seed catalog to understand that when you buy from the Berry Seed Company you are dealing with an old, established and absolute seed house. I personally guarantee to save you money tested and to satisfy yourself you have 60 days to have the seed at that time if you do not consider that we will refund the price paid plus the freight or express paid on the shipment. I want everyone buying seed from this Anniversary Sale to have the greatest bargain confidence in their purchases. I know the values and savings offered are genuine. I know that you cannot help but be pleased after the shipment arrives. This is the reason we make such a liberal sweeping guarantee.

I want you to read this catalog from front to back. You will find bigger and better bargains in it than you ever thought possible. You will find the Berry Seed Company one of the finest Mail Order Houses that you ever did business with, for we give our customers every consideration and treat them in the fairest manner possible. I don't know how to convince you of these statements, except to invite you to send us an order and see for yourself.

Our bank references are sufficient proof of our responsibility. I have printed a few letters from customers who buy every year from us. If I could talk with you just a few minutes I know you would want to buy your seeds from us. Our prices are so much lower and the bargains so outstanding in this Anniversary catalog that you cannot afford to pass them by without ordering.

Grass seed crops are short. The Department of Agriculture estimated the Clover crop about two-thirds as large as last year. Alfalfa less than half. Sweet Clover a little more than half, while the Timothy seed was only a third of a crop. This catalog comes to you at a time when we can save you most, as our prices are all based on early purchases and lower markets. I do not believe the Berry Seed Company ever offered the seed buyer such a golden opportunity to buy seed at such low prices.

We are celebrating our one-third of a century in business by issuing this Anniversary Sale catalog. We hope to add a hundred thousand new customers to our Seed Family. If you need seeds or nursery stock of any kind we want you to join us. I want you to send you a personal invitation to join our Anniversary celebration by sending you a gift. You can make your own selection of the gift and I guarantee you that everything will be satisfactory. I want you to respond and become acquainted with us.

Yours faithfully,
J. F. SINN.

A Customer for 24 Years

Nov. 9, 1923.
Gentlemen: I have been buying seeds from Berry for 24 years. I have lately club ordered my seeds, including my farmer friends to order with me. I have bought over \$15,000 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4 to \$7 per bu. by ordering from you. I expect to save even more this year as all kinds of seed are scarce due to bad winter last year. I find you people honest to do business with and your World Brand the very best buy. Your money back if not satisfied.—J. W. Gerhardt,
New Berlin, Illinois.

Our Ironclad GUARANTEE

We guarantee everything in this catalog to be exactly as represented. If upon receipt you find your order is not entirely satisfactory, please return it at once and your money will be refunded plus transportation. We further guarantee to give 60 days to satisfy yourself that you have purchased a real genuine bargain when you need keep our money safe. No customer's money will be guaranteed money and have a real genuine bargain when you need keep our money safe. No customer's money will be guaranteed money and have a real genuine bargain when you need keep our money safe.

We also guarantee if any of our flower or Garden Seeds when you buy from us, to arrive in good time, they will be replaced free of charge. Our Nurseries are guaranteed to arrive in good time, they will be replaced free of charge. Our Nurseries are guaranteed to arrive in good time, they will be replaced free of charge.

Our seed company protects the seed buyer and is lived up to, so it means just what BERRY SEED COMPANY, Clarinda, Iowa.

Our Capital and Surplus \$700,000.00

The phenomenal success of the Berry Seed Company at this time is largely due to the great amount of capital invested in the business and the unlimited amount of credit available. We are in position to go into the markets at the most favorable times and buy our seeds to the very best advantage on account of having the ready cash to plank down for them. Our capital enables us to buy special bargains, as many seedsmen become hard pressed for ready cash and are compelled by their banker to sell and we are offered these opportunities as the seed trade generally know that we are always in the market and awaiting any real snaps that are to be had.

These distressed cars we have snapped up from time to time, make these splendid bargains possible for our Anniversary Sale. Hardly a week goes by without we have the opportunity of buying a car or two of seed at a real sacrifice price owing to some seedsmen having to turn seed sometimes considerably under the market and its real worth.

VERY LARGE DEALERS

We know markets and what our trade demands, so being on the alert gives us an untold advantage over our competitors who in many cases are dividing their time in other lines of business and are not so well posted on the seed game. We are recognized as specialists in farm and grass seeds. We have sold as many as 150 carloads of Sweet Clover in a single year. We are large handlers and have built up this phenomenal business by turning our seeds on a very close margin. Our profits are never large, but the volume of our sales reaches into the millions. When you accept our Anniversary Invitation and become one of our customers you can then appreciate our Service and unequal values.

SUPERIOR CLEANING FACILITIES

Another most important factor in the producing of high grade seeds is the cleaning equipment. We have some of the finest cleaners known to the seed industry, the latest improved scarifier, polisher and graders, so as to refine our seed to the highest possible quality. Our superintendent of the cleaning department is an expert and does work in the way of purifying seed that is almost unbelievable. When buying seed from the country, it is necessary to be well equipped to clean and grade the seed up properly. This is where we shine, as we have had the experience in cleaning as well as the facilities. Our grades are most satisfactory and if seed does not clean up into the highest quality, it is not acceptable for our World Brand.

SEEDS OF KNOWN ORIGIN

There is another advantage of buying your Seeds direct from the Berry Seed Company, for we know in most cases the origin of all the seed we sell. When we buy seeds direct from the producer there is no question about its origin. Our test tags placed on the bag, in nearly every case, gives you the state in which the seed was grown. Much of our Alfalfa is of U. S. Verified Origin and by another year, we hope to have it all U. S. Verified, giving our customers this added security in knowing where the seed was grown.

TESTED AND GUARANTEED SEEDS

Every lot shipped should carry our test tag, giving the purity, germination, percentage of weed seed and inert matter according to the Iowa State Seed Law. We are very careful to have every sample coming to the office tested before buying, protecting the interest of our customers by eliminating lots containing dangerous weed seed.

Our laboratory is one of the busiest places during our buying and shipping season. Our Mr. L. C. Jorgenson (picture above) is highly trained, having taken special seed training under the supervision of the Bureau of Plant Industry, Washington, D. C. He is recognized as one of the most capable analysts in this part of the country.

When you buy your seeds from the Berry Seed Company you know they have been carefully tested. You know you are dealing with an old established seed house, and you know everything is guaranteed and must be satisfactory. Your trust and confidence placed in the Berry Seed Company at the time of ordering will be most securely safeguarded and protected by their reputation of 34 years of fair dealing. Our laboratory is your safeguard. Very few seed houses are equipped to test seed in the same efficient manner as the Berry Seed Company and our tests are very accurate, giving our customers the utmost protection.

World's Greatest Seed Bargains Now Available to One and All

SERVICE

The two chief essentials of a successful Mail Order Seed House are high quality and quick service. No one in the seed business appreciates these facts more than the Berry Seed Company.

Our business has increased with leaps and bounds and our Eastern customers demanded Berry's Seeds be supplied from a closer point than Clarinda. We now carry a complete stock of all Farm and Grass Seeds in Chicago in the above warehouse. This gives our Eastern customers the advantage of our low prices, a lower freight rate, and quicker delivery. Our customers are entitled to the best possible service in the way of quick shipment and the best values in seed money will buy.

We are offering a wonderful service in the way of supplying tested seed of known quality at prices far lower than the same quality can be obtained elsewhere. The large volume of our sales explains why we can sell seed of high quality at such attractive prices.

The magnitude of our business and our ability to serve you is well demonstrated by the facilities illustrated in the picture of the home plant and our warehouse and shipping facilities in Chicago. Address all mail to Clarinda. We have only a shipping branch and no office at Chicago.

KSO

AND UNCLE JOE

Our Service Department is in charge of Uncle Joe Faassen, chief announcer and Secretary of the Berry Seed Company. He is an agricultural expert and an authority on farm crops. He has made a study of farm crops and has qualified as a writer of real ability and help to the farmers. If you have farm problems and planning of crops, call on Uncle Joe. He handles much of the correspondence and is in position to help you with your seed problems.

TUNE IN ON KSO

Thousands of listeners prefer KSO to all other stations. Morning program starts at 6:30, noon 11:45, afternoon 3:00, evening 6:30 to 8:00, and 9:00 to 10:00. Our wave is 217 meters or 1380 kilocycles. Try and tune in on KSO and hear some of the splendid talks made by Uncle Joe.

HISTORY

The history of the Berry Seed Company is a very interesting story. Mr. A. A. Berry established the business in 1895 on his farm near Clarinda and the business continued to grow necessitating the incorporating in 1905. At that time Mr. J. F. Sinn joined the Company, and has been instrumental in developing and building it up until today there is no seed house that sells as large a volume of seeds direct to the farmers. We have the distinction of serving the farmers for 34 continuous seasons and during all that time, we have never been sued by any of our customers or had any complaints filed but what we were able to settle satisfactorily. During these years we have added thousands of new customers to our Seed Family. We are today serving more customers than ever before. We are well established and recognized as leaders in the direct selling and merchandising of seeds. Our seeds today are delivered to you by mail, train, ship and aeroplane. Nothing too good for Berry's customers. A gift for every order, see page 39.

1/3 Century Money Saving Service

This year we are celebrating our 1/3 of a century in the selling of seeds direct to the farmer by offering in this 34th Anniversary Catalog the greatest collections of Seed Bargains ever placed before the seed buyer. Every lot is a genuine bargain and our 1/3 of a century of money-saving service is behind every lot.

You are dealing with an old established reliable firm and one that guarantees every pound of seed sold. When you buy from the Berry Seed Company you have 60 days to test all lots. If you are not convinced you have saved money and have a big bargain in your purchase send the seed back. Your money is here waiting for you and your transportation charges.

**World's Largest
Seed House
Selling Direct
to Farmers
on the One Profit
PLAN**

Link-up With Berry Save Middlemen's Profits

You can do this as the Berry Seed Company buys most all of its seeds direct from the producer and we do our own recleaning and handling in such large quantities, that we buy at the lowest prices at which the crop moves. This fall we had our buyers in 14 states traveling from farm to farm, selecting and buying the finest lots of seed available at the very lowest possible prices. Our 34 years in the seed business gives us a tremendous leverage in buying as we know the producers in many cases personally and get the preference when buying their seed.

They know we pay cash and will treat them fairly and squarely when settling for the seed. It is our buying direct from the producer early in the season that permits us to offer such outstanding and unduplicated values. When you buy from us you are going directly to headquarters and not paying two or three middlemen's profits. Linking up with the Berry Seed Company cannot help but save you many dollars on every bushel of seed you require.

\$1,500,000

It would surprise you to see the tremendous quantities of seed we carry. As this catalog goes to press we have over \$1,500,000 worth of seed on hand in our warehouses, all recleaned, scarified and prepared ready for shipment on a moment's notice. Buying as we do our seeds as it moves from the producing sections, enables us to buy at much lower prices. We do not need to depend upon the carlot seedsman for our supply. In fact we have our stocks bought so that we can sell the carlot buyers, and do sell some of the largest seed houses a part of their supplies. When we can serve the largest dealers to advantage, we are sure we can sell the farmer who needs seeds and at a price that will save money. The largest users of farm seeds in many cases depend entirely on the Berry Seed Company for their supply. We want your order for we can save you money and give a superior quality.

WHY THE LARGEST DEALERS

You may wonder why the Berry Seed Company located at Clarinda, Iowa, are the largest dealers in the world when it comes to selling farm seeds direct to the farmer. This is due to the policy of selling a very large volume of seed on a very close margin. We pride ourselves on the efficiency of our organization and our ability to undersell any other concern when quality and service are considered. We have spent a third of a century in the seed business, specializing in farm and grass seeds until we have no equals. This business has been secured on the basis of fair play, biggest values for your dollars. This year we are celebrating our 34th anniversary and are making this catalog an outstanding beacon light to show the way to new seed buyers who are not already acquainted with our wonderful values in seeds. We have cut our prices and in many cases are selling seed for less than the wholesale price, due to the fact we want to add thousands of new customers to our list of seed buyers. We are giving the seed buyers an opportunity of getting acquainted and we feel sure a trial order will lead to more business. Our old customers are our greatest assets. They are always willing to vouch for our reliability and the fact they have saved many dollars by buying from us. (See letters front inside page.)

THESE WONDERFUL BARGAINS WILL NOT LAST

In sending out the large number of catalogs we are mailing, and pricing our seed so much lower than others are asking, can only bring one result, and that is a deluge of orders. We have anticipated these results and have fortified ourselves with tremendous supplies, but we cannot guarantee to fill orders of the late comers. Those of you who need seeds should use the catalog immediately, making up your order at the earliest possible opportunity. We will do our utmost to take care of it promptly and satisfactorily. You understand many of the lots offered in this catalog are special bargains bought especially for this Anniversary sale and when they are exhausted they cannot be replaced. This means that the early buyer is going to stand the best chance of having the order filled without question. Since markets are working higher we would urge you to buy your seeds early and save most by doing so.

WORLD BRAND (Extra Fancy).—Our very best grade of tested, recleaned seed, representing the cream of the crop. We stake our reputation on our World Brand quality. It will please and satisfy the most critical buyers and those who wish the best.

DEALER'S FANCY.—This is a very fancy Grade of seed which has been carefully recleaned and graded and meets the requirements of a large number of buyers of grass seed. It is superior to much of the seed offered in a retail way and a grade of seed that universally satisfies.

PLANET BRAND.—This pleases the average farmer and gives satisfaction and we do not hesitate to recommend it as good serviceable seed. While it has been carefully recleaned, it is not the best quality or the grade we recommend to critical trade. We consider it extra good value and is generally demanded by a large number of customers.

STAR BRAND.—This is our cheapest grade and the one frequently demanded for overflow land or when buying seed for fertilizing.

RED CLOVER

The GREATEST BARGAIN

LOT LEADER
\$18⁹⁰
 Pr. Bu.

A Beautiful Lot of Hardy Home Grown Seed
 New crop—Triple cleaned—Analyzed—Tested—Guaranteed to satisfy in every way. High purity. Strong germination. High color, plump berries. Free from noxious or dangerous weed seed. Suitable for sowing in any part of the United States. Lot "Leader" stands out as the greatest of all seed values. We do not believe anyone can come within \$2.50 to \$3.50 of our great bargain price.

Bought Early—Saved for This Sale

Last fall we worked hard in getting together a large lot of this seed in preparation for this great sale event. We were determined that this would be the most "talked about" sale ever undertaken by offering seed bargains of astonishing value. After securing this lot prices began to move upward giving us the opportunity to move this lot in a wholesale way for more money than we are now asking for it. And the markets are still working higher all the time.

We have saved this lot for this sale because the purpose of this sale is to get new customers and we are offering irresistible values to accomplish this result. When you learn by use the high and satisfactory quality of our seed you will do all of your buying direct from farm seed specialists at money-saving prices.

Lot "Leader" Thoroughly Dependable Seed

This seed will please every farmer who wants clean, hardy seed that will grow. That is what you will get. There is no guess-work about this statement. The seed is analyzed and tested. We know what it is and what it can do. It is sold subject to your approval. See money-back guarantee below.

We Challenge the World With Lot Leader

We ask you to be the judge in this matter. Our claim is not merely that others do not beat this bargain but that they do not even duplicate it. Our proposition to you is this: Buy Lot Leader now, while we have it. When it comes, take

MONEY BACK
 If You Can Duplicate
 the Quality at Our
 34th Anniversary Price

out some of the seed and compare it with samples others offer. When you find a sample of equally high value, then compare prices. If anyone can do as well, give you as good a value for the same money, you may then return our seed and we will refund you all the money you paid, plus transportation charges. What could be fairer?

Sold Subject to U. S. Government Test

While our seed has been analyzed and tested for your protection, we offer you every other protection you desire. After you receive the seed and look at the test tag, which is put on every bag, you can, if you wish, send a sample of Lot Leader to the U. S. Govt. Agricultural Department at Washington, D. C., for test, or you can send it to your State College. We give you 60 days in which to do this. If you are not satisfied then you can still return the seed and get your money, plus freight, refunded.

We positively know Lot Leader is high grade, dependable and satisfactory. You take no chance when you buy it. The wise thing is to buy it now, while we have it.

SOLD
 SUBJECT TO
U. S.
 GOVERNMENT
 TEST

MAMMOUTH RED CLOVER

The SENSATION of 1929

GENUINE NORTHERN GROWN MAMMOUTH CLOVER

Lot Matchless is just what its name implies. A value that for equal quality cannot be duplicated elsewhere. Sold on the same basis as Lot "Leader" Medium Red Clover, as described above. This is fine colored seed, plenty of purple in it. Nice large berries full of strength and vitality. Free from dangerous weeds. High in purity, quick in germination. Hardy northern grown seed.

GENUINE MAMMOUTH CLOVER SCARCE

Medium Red is scarce. A third less seed produced than a year ago. Mammoth even more short. Practically no seed whatever carried over by seedsmen from last year. Mammoth Clover will be hard to get later in the season. When crop is wanted mainly for soil building Mammoth Clover is generally used. Also is known as Sapling Clover and Bull Clover. Growth larger and coarser than Medium Red. Grown extensively in north where seasons are too short for two crops. This wonderful Lot Matchless was secured direct in the great northern producing section. We can't get such seed today at anywhere near the price we paid for it. It is a rare opportunity to save \$2.50 to \$4.00 per bushel and be assured of getting this genuine Mammoth.

LOT MATCHLESS WILL SATISFY ALL

In this history-making "One-Third of a Century" sale, Lot Matchless writes a big chapter. A beacon light of value that lights the path of more intelligent seed buying. It dispels the fog of doubt as to whether high quality can be bought at lower prices. It shows you how to make your seed dollars bigger. It proves the money-saving truths that direct buying and selling saves the consumer money. Remember, if you can duplicate this value you may return our seed and get your money refunded promptly. Get it while we have it.

LOT MATCHLESS
\$20⁰⁰
 PER BUSHEL

THIS GIANT THIRD-OF-A-CENTURY SALE WILL SAVE MANY DOLLARS

ECONOMY

ALSIKE

\$11⁷⁰ BU. 60lbs.

34th Anniversary SPECIAL

A Striking Bargain That Makes a Highly Satisfactory Seeding

This is the clover that some have so aptly called "The clover that never fails." Grows on wet land, sour land, and high land. A little goes a long way as the seed is very small, only half the size of red clover.

Lot Economy is a remarkable value that we secured especially for this great sale event. Most of our regular customers sow Alsike mixed with Timothy as a mixture of the two yields more than either one alone. Most of them use a mixture containing 10% to 30% Alsike. A 20% mixture makes a rich mixture.

We were able to secure in this lot "Economy" several cars of Alsike Clover that contained some Timothy at a price that makes it possible to make this astonishing offer. It is composed of over half Alsike clover and will make an exceedingly rich seedling; one that will give you wonderful results.

It is all double cleaned seed, extra choice quality. Very economical to sow. A seeding of only 10 lbs. per acre would give you over 80 Alsike seeds on every square foot of ground. Sow 8 lbs. per acre and you have 65 Alsike seeds per square foot.

Such a seeding makes highly gratifying yields of finest quality hay. Can be used for pasture or meadow. This bargain stands out as an unparalleled value under 1929 market conditions. You can cut your clover seed bill 40% to 50% by using this famous Lot Economy. Guaranteed to satisfy you. Your money back if you can duplicate it anywhere.

MERIT ALSIKE \$17⁵⁰

A Remarkable Bargain Offer

This lot of Alsike we bought early so we could make a bargain that would be second to none in the line of good, clean Alsike testing very free of weed seed. Several advances have taken place in the Alsike market since we secured this lot. It contains a small per cent of White Dutch Clover and a still smaller per cent of Timothy. Nothing harmful, just a little crop seed that permitted us to buy it at a low price. We wanted to give you a safe, dependable lot of Alsike of good germination and have certainly attained that in this lot "Merit". It is a value most deserving of the name "Merit" for it has fine quality at a low price.

This seed is very economical to sow. Six pounds per acre makes a good seeding. See price list for quotations on purest Alsike without any crop seed, but if you want to save \$3.00 to \$5.00 per bushel order this seed. It will give excellent satisfaction.

LOT SURE-GROW \$16⁵⁰

Alsike and White Dutch Clover.—The two Clovers easiest of all to start and makes the finest pasture. Hence the name Sure-Grow. You can buy high priced White Clover at a price lower than the cost of Alsike in this bargain lot. We bought lot Sure-Grow at about half its real worth owing to the fact the two clovers cannot be separated. You will find Lot Sure-Grow about half White Clover and one of the biggest bargains offered in this catalog. Lot Sure-Grow is high purity, free of weeds, guaranteed, and cheapest to sow. Don't wait, buy now. Can't duplicate later.

The Annual White Sweet Clover

Lowest Price in History

This remarkable seed value is possible only because we contracted our seed early before the general shortage of seed of all kinds was realized. This same quality of seed last year sold generally at \$16.50 to \$18.00 per bushel. It may therefore be considered a masterful accomplishment to be able to sell it for this money this year when all clover prices are working so much higher. Supply of seed still very limited. Higher prices might be realized but we are out to break all records in this sale.

The Phenomenal One-Year Sweet Clover

Nearly every farmer knows about Sweet Clover and its many money-making features. Hubam is a Sweet Clover, too, only it does in one year practically everything that the common Sweet Clover does in two. Sow Hubam in the spring like the common. It begins to grow rapidly after grain is removed. It makes full crop of hay same year. If not cut for hay it blooms and bears seed. Full benefits secured in four to five months after seeding. Hubam is an annual. Does not live over winter.

The seed of Hubam Clover has not been obtainable from all seedsmen. High prices have prevailed. In this "Third of a Century Sale" we are selling the highest grade of Hubam obtainable at the lowest prices this seed has ever been sold for since the crop was first discovered. The quality of Lot Marvel is strictly extra fine. Double cleaned seed, scarified by the new process and fully guaranteed. There is a challenge in value giving in this lot that no seedsmen will meet with seed of equal quality. In this sale we are piling one Climax Bargain on another and saving the American farmer thousands of dollars.

You will like Hubam because of the quick results it gives and you will like this special lot because the quality is so fine and it is priced to make every penny count. It is one of the finest values we have ever been able to offer in all the 34 years that we have been selling farm seeds direct to farmers.

HUBAM LOT MARVEL

\$13⁵⁰

CRIMSON

\$8.

60 POUNDS TO BUSHEL

An annual or one year clover in north and central states. Sown in spring, not too early, at 15 pounds per acre. Grows quite rapidly. Used largely for plowing under. May be used for hay or pasture. Seed considerably larger than Red Clover. Blossoms larger. Also sold as Giant Incarnate Clover. Will not live over winter excepting in south, where it is sown in the fall.

We sell a considerable quantity of this seed each year and have a very fine stock of seed priced very low for this "One-third of a Century Sale." A guaranteed bargain.

White Dutch Clover

\$23.50 per bu., 1/2 bu. \$12.00
60 lbs. per bu.—bags free

This is the famous pasture and lawn clover you all know so well. Seed of this clover is very small. Three to four pounds sows an acre. Makes quite a large growth when sown with other grasses, especially on moist land. Is often used in pasture combinations. Feeding value of White Dutch Clover is higher than others.

We use only northern grown seed, and supply thoroughly cleaned, new crop, high germinating seed. You can rely on the quality of this seed. This special sale price will save you a goodly sum on White Dutch. One seeding lasts for years.

OTHER
CLOVERS
ALL
BARGAINS
that You Can't Match
For PRICE or
QUALITY

LESPEDeza

\$5.50

OR JAPAN CLOVER

Another annual clover that grows on most any kind of soil, no matter how poor. Not so sensitive to acid conditions as most clovers. Easy to grow. Sown very widely throughout the south. During past few years large quantities have been grown in northern states. Grows fast. Dies out over winter. Reseeds itself quite readily if allowed to mature and scatter seed. Feeding value about equal to alfalfa. Sow 20 pounds per acre.

High grade Lespedeza sometimes is difficult to obtain. Have contracted some very fine stock for this sale, for in this book every bargain is a big bargain.

YELLOW ANNUAL SWEET CLOVER

\$4.00 per Bu.

This is a smaller type of Sweet Clover used in some sections for green manure. Does not grow as large as other varieties. Lives only one year. Seeding cost quite economical. Sow 15 pounds per acre. The other Sweet Clover varieties are generally better suited to the demands of our trade.

Our seed of Yellow Annual Sweet Clover seed has been well cleaned and scarified. Good purity and germination. Those wishing this variety will find the quality of our seed first class and very reasonably priced.

INOCULATE ALL CLOVER

PAYS BIG DIVIDENDS

All legumes such as Clovers of all kinds, Alfalfa, Vetches, Peas, and Beans should be inoculated before planting. Often inoculation means the difference between success and failure. Even though the crop would grow without inoculation, the yield would be larger and stand better and healthier if inoculated. The cost is small and returns large.

All legumes need certain bacteria for their growth. They cannot be soil builders without these bacteria. These bacteria may be in your soil and then again they may not be there. There is no way of knowing. You can make absolutely sure they are there by inoculating your seed with the pure culture that we supply.

NITRAGIN

For Clovers and Alfalfa and Vetch: 5 bu., \$4.75; 1 bu., \$1.00; 1/2 bu., 60c; postpaid.

For Cow Peas and Soy Beans: 5 bu., \$2.50; 1 bu., 70c; 1/2 bu., 40c; postpaid.

OUR INOCULATION IS GUARANTEED

There are many kinds of culture on the market. Some are of doubtful quality. The Nitragin and Nodule Germ we sell are tried and tested.

We handle fresh culture and positively guarantee that they will produce nodules on the roots of your legumes if used according to simple directions that come on each package. Your money back if they fail.

Pictures below give you an idea of the difference in yields between crops from seed not inoculated and that which was inoculated. Don't take chances by failing to inoculate all legumes.

COST VERY LOW

These guaranteed cultures can be had at a very low cost. When ordering be sure to specify the crop on which they are to be used.

BERRY'S SUPERIOR NODULE GERM

For Clovers, Alfalfa, Vetch: 5 bu., \$3.50; 1 bu., 80c; 1/2 bu., 45c.

For Peas and Beans: 5 bu., \$2.25; 1 bu., 60c; 1/2 bu., 35c.

INTRODUCING DALEA

The NEW MIRACLE CLOVER

Grows on Sour Soil

Our regular customers have known and used this clover for three years. There are many who get this book to whom this clover is new. Since we specialize in seeds we are among the few who can present this great discovery to you.

While new to many it has been grown in a limited way for a good many years. Like Sweet Clover its value was not known and appreciated until a few years ago an Iowa farmer by the name of Woods tried it and proved its great value. Its fame has now spread to many sections and the demand for the seed is phenomenal.

This clover is a one-year crop and accomplishes wonderful results in a very short season. Sown in small grain after grain is up. It grows fast after grain is removed, and makes excellent crop for plowing under. Its soil-building power is enormous. Gathers great quantities of nitrogen from the air. Crop is too bitter to eat. Cannot be used for pasture. Makes a good cash crop when used for seed as it produces 6 to 8 bushels of seed per acre.

Marvelous Soil Builder

The principal value however is as a soil builder. Thousands of farms need clovers. Some soils will not grow them without lime. Lime is sometimes not easily available and takes a lot of labor to apply it. Dalea is not sensitive to acid conditions like most clovers. It therefore solves the problem. It does its works quickly, needs just a few months. Can be sown as late as July and makes full growth to plow under. Grows on poor, sandy soil and clay and gumbo. Seed should be inoculated for best results. Nitrogen inoculation costs 60c for $\frac{1}{2}$ bushel size, \$1.00 for bushel and \$4.75 for 5 bu. size, postpaid.

CHICAGO

Wonderful Opportunity

We have slashed prices for this sale unmercifully. Last year seed of this quality sold for \$16.00 per bushel. This season we bought every pound of the seed of good quality that we could get and have practically a "corner" on it. Yet we are reducing our price to less than half of last year's prices. The supply of seed was somewhat more plentiful yet not enough to fill the demand. We have no doubt but what we could sell every pound we have for \$5.00 per bushel more money. Our policy however is to sell on a close margin. We want to see this clover grown in every section of the United States this year, and therefore have gone the limit in reducing our prices to startlingly low figures.

Lot "Miracle"

It is rightly called lot Miracle, for it is a wonder worker as a soil builder.

This lot of seed is new crop and beautiful quality. Absolutely the best Dalea seed is a greyish green color but shaped about like Red Clover. This seed has a bright shiny lustre that proves its strong germination. Lot Miracle has been scarified by our modern patented process making it the finest that can be bought anywhere at any price. Scarifying is just as important as inoculation in growing Dalea. Everything that modern seed science can do for seed has been applied to lot Miracle. It is guaranteed to please the most critical and exacting buyer.

Start with this wonderful new crop this year. Figure 15 lbs. of seed per acre. In this sale you buy it at a lower price than it has ever been sold for before. Order now while we have it, as we cannot get additional supplies. A real anniversary bargain and a gift with every order.

BUSHEL

OTHER ALFALFA SPECIALS

Lot Shield

Finest Utah Mountain Grown Extra Hardy
U. S. Verified Origin Seed

Competition capitulates to this crowning challenge.

A victory in value-giving that wins the admiration of all. This lot "Shield" is a masterful bargain. We have not seen any lot of new seed in all the thousands we have examined this year that was anywhere near as fine a value as this. No lot that had a higher color or plumper or larger berries. When you see it you will say as we did, "What beautiful seed."

High purity and germination. Remarkably free of weeds. Extra winter hardy. It's just the kind of seed that particular seed buyers would select. You can't possibly go wrong when you buy such seed.

U. S. VERIFIED ORIGIN

Color, size, purity and germination are things you can see or test out, but you can't test out to see where the seed was grown. Yet the place of origin or where it was grown is just as vital and important. Often seed from one section is sold and represented as seed from another section. To protect buyers against such unfair practices the U. S. Government established a service that traces seed from point of origin to point of sowing. Only dealers complying with certain strict regulations are authorized as dealers.

\$15⁶⁰
CLARINDA
\$15⁸⁰
CHICAGO

in U. S. Verified Origin Alfalfa seed. We are so authorized and this Lot Shield is one of our finest lots of Verified Origin seed. We offer it to you as Utah grown and you can wager your last dollar that it is that and nothing else because it is U. S. Verified.

PRICED VERY CLOSE

Alfalfa seed is commanding higher prices than last year on account of extremely short crop. Some are using this as an excuse for extra profits. You will see seed of the character of Lot "Shield" selling at much higher prices. Around \$15.50 to \$20.00 per bushel is in most instances the established price. Let us supply you direct. We always operate on a one small profit plan. During this "friend-making sale" we have cut drastically into this small margin. In a year of upward prices we are coming out with these wonderful bargains. Prices so low, quality considered, that farmers will see that they will have to buy from us if they want to get as much as possible out of every seed dollar.

LOT "SHIELD" GUARANTEED EXTRA-HARDY

This is so far superior to the common southern grown Alfalfa that there is hardly a basis for comparison. Alfalfa in the section where this seed was produced has to stand temperatures of 25 degrees below zero. That is a low point not reached in most places. Alfalfa that survives that will live under most any condition.

LOT SECURITY

Another Master Value in U. S. Verified Origin Alfalfa

This is hardy, clean, high germinating seed. A lot that we secured from a party who was willing to sacrifice a little for a quick cash deal. We are passing it on to our customers in this 34th Anniversary Sale at a price that will save you at least \$2.00 per bushel. Lots of dealers don't offer you U. S. Verified Origin Alfalfa seed at any price. They don't have it. A few years from now, when the meaning of U. S. Verified is better known, most farmers will insist on such seed. The crop producing the seed has withstood temperatures of more than 25 degrees below zero. It has lived through drought and storms. For practical results you will find it fully color. Nice berries. As satisfactory as higher priced lots as germination is high.

LOT SECURITY

Highly Satisfactory Seed

Practically the only difference between this and the more expensive lots is a shade difference in color. Not quite so uniform appearing. From the standpoint of high purity and strong germination it is most satisfactory. This is double cleaned seed, and in every way prepared with exactly the same care as the finest seed.

Equal to the Best

You are absolutely secure in your purchase when you buy Lot Security. What many dealers sell as their best will in many cases not be equal in quality to this fine lot of seed. Get our samples and compare. Better still, order as much of this seed as you will need now, so you will be sure of getting it. Then when you get the seed compare it with other values offered you. You can return our seed if we can't save you at least \$1.50 per bushel.

Bear in mind the importance of this U. S. Verified Origin Stock. This is for your protection and security. Satisfaction or your money back. Add 25c per bushel for Chicago shipment.

\$13⁸⁰

LOT GOLD SEAL \$25⁰⁰

Another Triumph in Value Giving
Genuine Idaho State Sealed Grimm—Dodder Free
98½% Pure

Nearly every farmer knows the high reputation of Idaho Grimm Alfalfa, and are glad to pay a good premium to get it. This year the Idaho Grimm is very short and state sealed stock has been hard to get. It was only by having several of our own buyers right in the state that we were able to secure this seed at prices that permit us to make such an astonishingly attractive price. You will find most dealers asking in the neighborhood of \$5.00 per bu. more for Genuine State Sealed Idaho Alfalfa seed. The crop is the shortest in 11 years, and you will find that prices will tend to advance still further by spring.

Lot "Gold Seal" Very Desirable

Every practical farmer who wants to sow Grimm will be delighted to get a chance at such a value. This is double cleaned stock that analyzes free from doddars and all other noxious weed seed. It tests 98½ per cent pure and strong germination. It would test 99½ if it were not for a very small trace of other crop seeds. It is especially free of weed seeds. It is just a shade under the extra fancy for color. This does not affect its practical value in any noticeable degree. Personally, we would certainly pick this lot when considering the great difference in price. This lot is quoted at a figure that will save you at least \$3.00 per bushel. It is selling at this low figure as we are out to break all records of value-giving in this unrivaled sale sensation.

You Save at Least 20 Per Cent on Lot "Gold Seal"

If you will take the trouble to compare values on Genuine Grimm Alfalfa you will soon discover the truth of this statement. Select any lot of state sealed stock, preferably Idaho Grown. Check quality for quality and price for price. In many cases the saving will run over 20 per cent. Remember this lot is analyzed, tested, labelled, and state sealed. Sold subject to U. S. Government Test, and under the provisions of our unparalleled guarantee. "Your money back if you can duplicate the value." Sow 12 pounds of this seed per acre.

Lot "Gold Seal" is one of our masterpieces in this sale. Be among the thousands to join the Berry Seed Family this year and share in these great savings.

Lot Certified Grimm Alfalfa

Bright Color—Extra Fine Quality

U. S. Verified Origin Alfalfa Seed Shipped in Sealed Bags—
Sold Subject to your approval.

This is another record-breaking bargain in this supreme seed-selling sale. It's a beautiful lot of seed. Large berries, fine color, extra high purity, strong germination. It leaves nothing to be desired in quality. And it's genuine Idaho and Montana grown Grimm. The origin or "place where grown" is certified to by the U. S. Department of Agriculture. This "Verified Origin" is a Government service but recently begun by the U. S. Government for the protection of seed buyers. All lots are traced from producing sections to consumers. This lot is so verified. You will receive extra fine genuine Grimm when you order it.

LOT CERTIFIED ALMOST A MIRACLE

This value may look like a miracle to some, but it's really due to careful buying direct in the producing section, a modern cleaning plant, and low operating cost. That, together with a small profit, because we are practically forgetting about profit in this "One-third of a Century Friend-Making Sale." If we had not purchased this seed early we couldn't have made you such a price, for we couldn't duplicate it today. Early buying will be using wise judgment.

SOW GRIMM THIS YEAR

It is really economy wherever there is much winter-killing. After a bad winter, when ordinarily Alfalfa winter-kills badly, the yields of hay are greatly reduced. Often re-seeding is necessary. In such a year the Grimm withstands most any weather, will yield enough more hay per acre in one cutting to pay the total cost of sowing Grimm. Ask your county agent or your state college. They all endorse Grimm.

Ask them about U. S. Verified Origin Alfalfa and they will proclaim it as one of the finest features of service ever undertaken by the Government. We have no value more attractive than this special Lot Certified Genuine Grimm Alfalfa.

Our general 132-page catalog tells more about Grimm Alfalfa. You can have a copy of it free by mailing the enclosed postal card, which can be sent without a stamp. We will be glad to send you that book, but don't wait that long with your order. We cannot begin to duplicate this bargain after the seed is sold that we bought early.

\$23⁴⁰
PER BU.

STATE SEALED AND CERTIFIED GRIMM

Most of the large Alfalfa seed producing states have direct supervision over many fields of Grimm Alfalfa. Any farmer who wants to sell state sealed and certified Grimm Alfalfa notifies the proper state authorities. He secures approved Genuine Grimm seed. He sows it on fields a certain distance from any other Alfalfa. At harvest time the hulling is supervised by state inspectors. Bags are sealed as they come from the machine. These are moved to cleaning plants where the cleaning is again supervised by the state and resealed and retagged by the state. Thus absolute protection is given the buyer that he has genuine Grimm Alfalfa.

MARVELOUS MIXTURE

A MARVEL FOR PRODUCTION

Fifteen years ago we first marketed this extraordinary combination. It satisfied our customers even beyond our fondest expectations. The use of Marvelous Mixture has spread like "wild-fire."

No other combination has piled up such record-breaking yields or rich, nutritious hay as has this mixture. Our sales, which now amount to hundreds of thousands of pounds of this seeding, prove its growing popularity. Marvelous Mixture is almost invariably the choice of the farmer who wants plenty of clovers and yet hold his seeding costs down to bed rock. We can sell this seed at astonishingly low prices because we can buy a great many lots of seed that are grown mixed at liberal reductions.

THIS SPECIAL PRICE SENSATIONALLY LOW

The stock of Marvelous Mixture that we have assembled for this "One-third of a Century Sale" is the most remarkable evidence that seed specialization pays dividends to our customers. The large cash buying power of the Berry Seed Company is well known to large seed producers, and we thereby often get first chance to buy many lots. Samples from seed growers pour into our office by the thousands in the fall. We have watched all these offers with discriminating care and as a result have these stocks that make these money-saving values possible. This bargain is an attractive oasis in a desert of high prices. To be able to offer such seed at the low price of \$6.90 per bushel is truly a marvelous accomplishment.

COMPOSITION

Marvelous Mixture is 50 per cent Clovers. Consider what this means to you. You must use plenty of clover, if you want to farm profitably. You can't use the excuse of high prices with such a bargain before you. The clovers in this combination are Red Clover, Alsike Clover, Alfalfa and Sweet Clover. These are all the best clovers and the standard varieties for this country. The balance is Timothy. It is good, clean, vital seed, too. By purchasing some lots of Timothy mixed with Clover and some lots of Alfalfa mixed with Sweet Clover or vice versa we can buy high-grade seed considerably below its actual value. You get the full benefit of our service when you buy such seed.

SEEDING

You can handle this like any clover seeding. Sow on winter wheat or with spring grain. We believe that any seeding has a better chance for success if the seed has some covering when sown.

Sow Marvelous at the rate of 12 pounds per acre. A seeding cost of less than \$1.75 per acre. Think of it! All clover prices higher and yet a seeding so rich in clovers at such a low cost. And it's fine seed, too. Purity, germination, color, plumpness and hardness. All these points of quality rank high in Marvelous. Produces more hay, richer hay at a lower seeding cost than any other combination of similar character that you can buy. Enriches land. Inoculates soil for Alfalfa. It truly is Marvelous in every way.

FOR PERMANENT SEEDING

A GOLD MINE FOR QUALITY

Lots of clovers in a mixture means a higher feeding value. Clovers are rich in protein. Protein is necessary and a high priced feed. Farmers spend millions of dollars for tankage and other protein concentrates. Much of this could be saved if more protein were grown on the farms in the form of clovers. Hang on to the cash. Let your acres produce this vital food element. In addition you are getting a more fertile soil for these clovers are nature's forces for keeping a proper balance of soil fertility. It is this superior quality of our Marvelous Mixture together with its enormous yields that makes it such a great favorite in all parts of the nation.

GUARANTEE

It's guaranteed, of course, like all our seeds. Triple cleaned, analyzed and tested. Sold subject to U. S. Government or State Test. Buy it now. If at any time within the next 60 days you think you can equal this value you can send your seed back and get your money plus freight refunded.

Sweet Clover and Timothy

A 50-50 Mixture
\$4.00 Bu.

This combination fills the needs of those who know the great value of such a seeding. Makes very heavy hay production. Timothy and Sweet Clover together makes a dense mass of vegetation. Feeding value extra high. Excellent for soil building. Reduces seeding costs to the minimum. Twelve lbs. sow an acre. Good quality cleaned seed. High purity and germination. Very popular with our trade. We sell enormous quantities of it. It is a big bargain at our special sale price. If shipped from Chicago add 15 cents bushel to above price.

Alfalfa, Clover, Alsike and Timothy

\$5.40 Bu.

This mixture specially prepared to meet a great popular demand. Excellent way to introduce Alfalfa to your farm. Big yielder. Makes excellent hay. Makes an economical seed. Use 12 lbs. per acre. Seed thoroughly cleaned. High quality.

We are selling this fine seeding at a real bargain price. It's another gem in our collection of super-values. A seeding that brings satisfaction. Demand for this combination growing fast. You get an extra measure of value in this seeding.

If shipped from Chicago add 15c per bushel.

ALSIKE AND TIMOTHY

Our No. 1
Mixture, a Rich Mix-
ture of Clean Seed

LOT "RICH"
\$5.30 CLARINDA
BU. CHICAGO \$4.50 BU.

Contains 20%
to 25% Alsike
Clover Seed

This is a bargain that is a super-value. A seeding that satisfies thrifty buyers and practical farmers. In it you realize the double economy of high quality at a low price. Even among the dazzling bargains that are packed in this catalog this Lot Rich stands out prominently like a diamond scintillating in the sun.

A Heavy Yielding Combination of High Value

Alsike, the richest of clovers, is a natural companion of Timothy for the two mature at about the same time. They grow on the same types of soil and make hay of very fine quality. These two grown together will produce a larger yield of hay than either one grown alone. The Timothy supports the Alsike, making it grow tall and erect. The Alsike stimulates the growth of the Timothy. It makes a combination that produces an amazingly heavy yield of hay that has a high feeding value. We sell many carloads of this mixture every year. It is our most popular one and it is certainly deserving of its favoritism.

Equal to 40 Per Cent Clover Mixtures—Costs But Little More Than Timothy

Alsike is a small seeded Clover. Twice as many seeds per pound as Red Clover. A 20 per cent Alsike mixture is practically equal to 40 per cent of Red Clover. This seed is re-cleaned and high in germination. We bought this seed already mixed and at almost a Timothy price. We added some Alsike to make it a very rich mixture and have in Lot Rich a value and a bargain second to none. It costs very little more per acre than the best Timothy. Not only does it produce more and better hay, but keeps the soil in better shape. Alsike is a soil-builder. Costs less than \$1.50 per acre to sow. Eleven to 12 pounds sows an acre.

You'll be pleased with this dollar-saving bargain. We guarantee that you'll be satisfied. It is one of our finest "friend-making" offers.

ALSIKE AND TIMOTHY NO. 2 MIXTURE

\$4.50 Per Bushel Clarinda, \$4.65 Chicago

In this mixture you get the same high quality re-cleaned seed you do in Lot Rich. Equally desirable in every way except that it contains less Alsike, about 12 to 15 per cent. This mixture is plenty rich to please many farmers. Remember that a little Alsike goes a long way. Those who want clovers and yet want to make the most economical good seeding should select this combination. It is far superior to straight Timothy and costs but little more. Forty-five pounds to bushel.

RED CLOVER AND TIMOTHY

In this lot we give you the old stand-by of thousands of farmers at an astonishingly low price. With Red Clover prices advancing and Timothy firm, due to short seed crops, this value is little short of amazing. Early purchases of seed grown mixed is the only reason we can make such prices. There is hardly an offer in this book that we could not sell today in a wholesale way for what we are selling it at direct to you.

Quality Very Desirable

This is good seed. It is live, clean seed. Both purity and germination are high. Contains a goodly percentage of Clover, around 15 per cent. You'll be surprised what a fine stand of clover can be secured from such a seeding. This has been the standard of this mixture of ours for many years. Farmers who have grown it, hail it as a famous value that makes each dollar spent for it an oversize dollar. It's guaranteed, of course, like every other item. The price at the side is good for this sale only. Forty-five pounds to bushel.

RED CLOVER Alsike and Timothy

A triple combination rapidly gaining in favor. Claimed by some of our customers to be the best of the four described on this page. Production seems to be heavier than just Red Clover with Timothy. Percentage of Clovers about the same. Seed is double cleaned, high germination and very pure. Sown at same rate as other mixtures, about 11 pounds per acre. Seed is laboratory tested and labelled to conform to Iowa seed law. Sold subject to your test and approval.

More for Your Money

By selecting these special lots of seed grown mixed we can bring to you these matchless bargains. We secure them below the value of the separated seed. You can't buy equal qualities separate and mix them at such a low cost. You profit from our careful buying and cleaning service. Then remember it goes direct to you instead of passing thru several hands first. Buy on the one small profit plan and save money on high quality. See page 39 for special premiums to new customers.

Timothy **220 Bu. Lot PURITY 99 1/4%** **PURE**

A "FRIEND-MAKING" BARGAIN

It is new crop, clean, live seed. Good color, 99 1/4% pure solid fully matured Timothy seed. High germination. Lot Purity is another one of those astonishing bargains that establishes the leadership of the Berry Seed Company as farm seed specialists selling direct to farmers.

This lot is triple cleaned over our new modern cleaning devices and certainly makes a most practical and economical seeding. It has just a little more hulled seed than our World Brand. That's merely a matter of looks. The purity and germination of Lot Purity are first rate.

LESS THAN 70c PER ACRE

That is all it costs to make this fine seeding. A quarter bushel sows an acre. It is positively the cheapest seeding you can make. We have not selected a cheap grade of seed to sell at a low price, but have taken this fine quality and put the price down to a figure that halts competition and makes the farmers' dollar a lot bigger when used in buying direct from the World's Largest Direct selling Farm Seed Company.

EXCEEDINGLY LOW SEEDING COST

No one can afford to neglect sowing grass when a seeding can be made for less than 70c per acre, by using our new crop high quality triple cleaned Timothy seed. We are selling this seed at this unbeatable price in the face of a short seed crop that was only about half as large as that of last year.

Being located in the heart of the World's greatest Timothy seed producing section we became aware of the shortage before most dealers realized it. Thus by stealing a march on our competitors you have an opportunity to save from 20 per cent to 30 per cent on your Timothy seed purchases.

This lot is reliable, dependable, and in every way guaranteed to satisfy you. Sold under the provisions of that most liberal ironclad guarantee "your money back if you can duplicate this bargain anywhere else." In this offer you have one of the most sensational offers of the most extraordinary seed sale ever conducted. Consider the prices of other seeds and compare seeding costs. When you can sow high germinating seed like this lot at this low sale price you are getting a real value.

A timothy seed hardly ever fails. Crop grows on most any type of soil. One seeding lasts several years. Perfectly winter hardy. Eleven pounds per acre makes a good heavy seeding. Buy Timothy seed direct from the great producing section. Participate in this unrivalled One-third of a Century Sale. Save money and secure the greatest Timothy seed value on the market today—bar none.

PERMANENT PASTURES and Meadow Mixtures

COMBINATIONS ON GRASS AND CLOVERS

Prepared to Give a Maximum Production of Feed at a Minimum Cost of Seeding.

Again we score a victory in value giving by making such seedings available to the American farmer at such a low cost. These mixtures are giving wonderful results. The proper combinations are obtained by combining our knowledge of grasses and clovers and soils with years of experimenting. The low prices are made possible by careful buying, cleaning, and blending of seeds. These are not new and untried mixtures. Our customers have used them for years. Remember that the Berry Seed Company has been a reliable source of farm seeds for over a third of a century.

KINDS OF CHOICE RECLEANED SEEDS USED

These combinations consist of varying proportions of recleaned seeds of the following varieties: Red and Mammoth and Alsike Clover, Alfalfa, White Clover, Sweet Clover, Blue Grass, Timothy, Red Top, Orchard Grass, Meadow Fescue, English Rye Grass. The combinations vary to meet the different conditions and purposes for which they are

Italian Rye Grass, Bromus Inermis, etc. to be used. Figure on using 15 to 20 lbs. per acre.

Blue
Ribbon
Quality

\$12.80 per 100 Lbs., Clarinda
\$13.25 per 100 Lbs., Chicago

This great perennial grass selling at a price fully \$2.50 per 100 pounds below what the average seedman is asking for such a fine quality of seed. A bargain in grass seed that can't be duplicated elsewhere. This grass has a feeding value and a producing capacity superior to the average grass crops sown in this country. It is very palatable. Live stock is fond of it and do well on its nourishing elements.

Bromus is also one of the hardiest of our tame grasses. It resists both drought and extreme cold amazingly well. Thus for permanent purposes it is most desirable.

Bromus attains a good growth and makes very good hay. The leaves are a little broader than of the average grass and contains a lot of feed value. It stools out well and is therefore well adapted to pasturing. Stands lots of abuse, which is a prime requisite of a pasture crop.

OUR SEED QUALITY VERY FINE

Bromus is the largest seeded variety of any of the grasses commonly grown in this country. Seeds are long, fairly broad and very light in weight. It is one of the most difficult grasses to clean.

You should however insist on only the best cleaned seed. We spent a great deal of care and time in cleaning and grading our Bromus seed last fall, and have a fine, clean, high germinating product that we are justly proud of.

More and more Bromus is being demanded by our trade. The better the grass becomes known the more we sell of it. Not at all particular as to soil conditions. Grows most anywhere. Our stock is fair sized, but advise early ordering to avoid disappointment.

ORCHARD GRASS

Another money-saving opportunity in this lot of recleaned Orchard grass. Very nice bright seed. High germination. This grass comes on very early in the spring. Good feeding value. Especially adapted to growing in shady places. An almost indispensable grass for pasture mixture. Has strong root system. Often sown on banks and levees. Not particular as to soil condition. Sow about 20 lbs. per acre. See wholesale price list page 42.

KENTUCKY BLUE GRASS

A grass that most every farmer knows and uses for pasture either alone or in combination with others. Your most important consideration in buying Blue Grass seed is to get it clean and live. You will find our extra fancy quality a grade of seed that is better than what is often sold as the best. This seed has gone through a double cleaning process making a very fine value. It is a bargain at our prices. See price list.

ENGLISH BLUE GRASS

Also known as Meadow Fescue. Next to the common Blue Grass is the most popular for a general, permanent pasture seeding. Grows two to three feet high. Very nutritious. Resists cold and drouth. Makes good hay as well as pasture. Does well even on poor soil. It is a deep-rooted grass. Grows on practically any kind of soil. Especially fine on rich, heavy land. Good on gumbo. Sow 20 to 25 lbs. per acre. We'll save you money, quality considered. See price list.

RED TOP OR HERD GRASS

Grows almost anywhere. Even the poorest land and the wettest land will grow Red Top. Many farmers do not appreciate the full value of Red Top. It is very nutritious unless allowed to become too old. We recommend it for pasture mixtures. Begins growing early. Stay on the job throughout summer and autumn. Grows in all parts of the country. Contains more protein than Timothy. It will pay you to use more of it. During this sale we are making special wholesale prices that will save you money on quality seed. See price list.

ENGLISH RYE GRASS

A rapid-growing grass. Very nutritious. Makes good quality. Its quick development of a rich, green sod makes it desirable for many purposes. Fine in mixtures to provide quick growth. Sow 20 to 30 pounds per acre when sown alone.

ITALIAN RYE GRASS

Similar to English but a larger and stronger grower and is an annual. Makes quick spring growth from an early seeding. Often used in pastures and lawns to give good growth while slower growing grasses are getting started.

CANADA BLUE GRASS

Sometimes called Virginia Blue Grass. Exceptionally good on stiff clay soils. Good for gravelly clay, but not for sandy soil. Grows on soil of poor fertility, excellent pasture grass. Makes good grazing for dairy and beef cattle. Also used in lawns and golf links. Stands hot weather better than Kentucky Blue Grass. Can be grown further south. Sow 20 to 30 pounds per acre. Price list on page 42 will show you how to save money on this seed.

BERRY'S BLENDED LAWN GRASSES

A handsome velvety lawn is an enviable asset and anyone can have the finest lawn by using Berry's Blended Lawn Grasses. Our mixtures are carefully selected and contain the choicest grasses adapted to lawn purposes.

We have a lawn grass for every need and our seed is dependable and guaranteed. Berry's Extra Choice Mixture is best adapted to about nine out of ten lawns and you cannot go far wrong in selecting it.

EXTRA CHOICE LAWN MIXTURE

Our most popular blend, containing, largely, Blue Grass, Red Top, White Clover, Rye Grass and other special grasses best suited for the corn belt soil conditions. Postpaid: 1 lb., 45c; 5 lbs., \$1.90; 10 lbs., \$3.50.

Southland Lawn Mixture, containing Bermuda Grass and other varieties adapted to a hot, sunny climate. Postpaid: 1 lb., 60c; 2 lbs., \$1.10; 5 lbs. or more, 50c lb.

Special Terrace Mixture for sloping places. Prices same as Southland.

Shady Spot Lawn Mixture—For shady places. Prices same as Extra Choice.

SUDAN GRASS

\$2.75 LOT GRAND

PER BU.
50lbs.

A Real Bargain

It is one of those surpassing values that you will appreciate all the more about seeding time. From our study of market conditions we believe that we are facing about the same situation in Sudan Grass Seed that we experienced a couple of years ago. The market was firm with slight advances up to seeding time and then the price shot skyward. Dealers failed to anticipate the demand that came and it was discovered that stocks were too small to meet it.

Markets are firm this year. Some advances have already occurred since we contracted this lot Grand. It is worth more money than we are selling it for at this time.

Quality Very Fine

The quality of course is what makes the bargain. It is new seed of high germination. Fully matured, properly cured. Free from Johnson grass. Excellent purity. In short it's the kind of seed that satisfies. When you buy lot Grand you have the double economy of a low price plus high quality. That is the combination that is making this sale a nation-wide sensation.

See page 39 for extra premiums for new customers.

A Wonderful Crop—A Very Low Price

There has never been a crop with the possible exception of Sweet Clover that has gained so rapidly in the favor of the American farmer as Sudan Grass. Its record-breaking almost unbelievable yields of high quality hay have been responsible for its widespread use. Today Sudan easily surpasses all other forage grasses in popular favor.

Nature of Sudan Grass

It is of the cane family. Finer stemmed and more leafy. A wonderful crop to stool out. Over a hundred stems have been counted on a single plant. Yields of cured hay have been secured ranging from four to ten tons per acre. Hay has fine feeding value and stock of all kinds is very fond of it. They relish it as a pasture, too, and it is used extensively in that way.

It is a warm weather crop. Should not be sown until the ground is thoroughly warm. Corn planting time or later. Sow 20 to 25 pounds per acre. Cover seed about an inch deep. You can get a more detailed description on Sudan by reading page 58 of our large general catalog. A copy of this catalog will be sent free. Use enclosed postcard in asking for it. This postcard can be mailed without a stamp. Place your order from this catalog, however, to get this special price.

BUCKWHEAT

Japanese Buckwheat.—Superior to common buckwheat. Stronger grower. Better resists drought and blight. Rich dark brown seed. Thin hull, large grain. Excellent for light sandy soils or dry climate. Does well under practically all conditions.

Silver Hull Buckwheat.—Silver gray colored seed. Solid, medium sized grain. Blooms longer than the average varieties. Makes light colored flour. A fine variety for bee pasture. Very popular.

Sow buckwheat about the middle of June, three-fourths bushel per acre. Makes fine catch crop.

Our selected seed is priced unusually low. See page 42.

MILLETS

Golden or German Millet

This is the genuine German stock and far superior to the common millet. Yields are much heavier and quality much better. Grows taller. Heads are much larger. A maximum producer both of hay and seed. Attains a height of 4 or 5 feet on good soil. Makes a paying crop. Can be sown late and used as a catch crop. Good money in seed production. Yields up to 40 and 50 bushels per acre. Our seed is high quality new clean seed. We have entered at a bargain quotation on our price list on page 42. To get it at these bed-rock figures you should place your order early.

White Wonder Millet

A revelation to those who have never grown this wonderful variety before. Fast taking the place of the German. An extra heavy yielder of fine-quality hay. You will be amazed at the enormous heads of this White Wonder. Single heads will run up to 8 to 18 inches long and contain as many as 15,000 seeds. It sure is a wonder. Yields usually half again as much as the German. Some growers say it will outyield other Millets three to one. Heavy foliage, broad leaves. It is early. Matures in a short time. Our seed quality excellent. See price list. Save money by buying early.

Russian or Siberian Millet

Not so large as German, but two or three weeks earlier. Very leafy and bushy. Prolific stooler. Cattle are very fond of it. Makes good pasture. On account of its earliness can be sown quite late. Grows 2 to 4 feet high. Makes good hay. Seeds colored reddish brown. This variety is especially popular in northern states.

Seed supply of first-class quality. Good quantity on hand but supply not large. Special reduced prices for this sale. See page 42.

Crops That Cut Prices That Reduce Feeding Costs Seeding Costs

BILLION DOLLAR GRASS

\$7.00 PER 100 LBS. CLARINDA

\$7.25 PER 100 F. O. B. CHICAGO

A Great Annual Forage Grass

Billion Dollar Grass is a variety of Millet. It earns its name from its enormous yields of hay. It is a luxuriant grower, attaining a height of 5 to 6 feet and sometimes higher. Produces as high as 26,000 to 50,000 pounds of green fodder per acre. Can be used as hay or for silage and is often utilized as a pasture crop. You can imagine the profit from yields such as these. The feeding value is good. It has produced 12,000 pounds of cured hay per acre. No wonder it is called Billion Dollar Grass.

Other Valuable Characteristics

It is a prolific seed producer, yielding as high as 67 bushels of seed per acre. This makes a fine cash return. Most farmers who grow it want to feed the crop, however, and that usually results in a short supply of seed. Last year we sold out real early in the season. This year we contracted a larger stock. Supplies are not large, but can fill orders early. Get a start with this valuable crop. Makes hay in six to ten weeks. Sow about May 1st, about 20 pounds per acre.

Seed is first-class quality and a real bargain.

BERRYS Annual Pork Producer

\$3.50 PER 100 LBS. CLARINDA

\$3.75 PER 100 F. O. B. CHICAGO

A Quick Growing Hog Pasture

This fills the needs of those who want something that has a high feeding value; can be sown quite early and grows fast. Helps you produce pork at a lower cost and in quicker time. Good, rich pasture develops big frames and healthy bodies.

The crops in this seeding are all annuals. The seeding, therefore, lasts only one year, but it does give quick results. Vetch, Rape, Barley, Cane, Speltz, Sudan, Japanese Millet, Oats, Rye, Canada Field Peas, etc., are crops used in this mixture. This gives a combination that furnishes an abundance of pasture over a long season.

Turn Waste Places Into Profit

Many farmers have odd plots here and there that produce nothing but weeds. Fence them in and seed to our Pork Producer. You can make them produce gold for you. Do not depend only on waste places for seeding this, as it is a crop worthy of the best land. If you are short on pasture at certain times of the year use this to fill out. Sow early. It stays on the job all summer. Plow and harrow the ground thoroughly. Sow about 40 pounds of this mixture.

Harrow it in thoroughly. You will find a lot of satisfaction in a good stand of our Pork Producer because it's a money-maker.

CUTTING BILLION DOLLAR GRASS

CANE

FOR FORAGE AND HAY

Cane is an exceedingly heavy producer. The yields will average about 6 tons per acre. Eight tons is not unusual and yields of 15 tons of cured hay per acre are reported. There are various ways of sowing cane, but the heaviest yields and finest quality of hay are obtained by broadcasting or in close drilled rows.

VALUE OF CANE

The crop may be cut green and fed or pastured or made into hay. It is excellent summer and early fall feed. Stimulates milk flow in dairy cattle. Takes care of a lot of stock per acre. If pastured, start stock on it gradually. This is also advisable when cut and fed green. Crop may also be used for ensilage. Cane is a prolific seed producer, yielding about 30 bushels on the average with yields as high as 60 bushels being secured. Cane is a quick grower and may be used as a catch crop.

AMBER FORAGE CANE

The most popular variety with our trade. Earlier than the average and more slender stalks and comparatively narrow leaves. Excellent hay type.

ORANGE FODDER

Has larger and heavier stalks and more abundant leaves. Seed heads more compact. A somewhat heavier yielder, but not quite so fine quality.

PRICES

See price list on page 42 for quotations on fodder cane. Our seed of fine quality. Bright, clean, high germinating.

MOLASSES CANE

For sorghum or molasses seed must be pure and have some very fine seed for you.

Ames Special Sorghum.—Improved type of the Ames. Makes sorghum of fine flavor and color. Very juicy.

Silver Tip Sorghum.—More of the orange type. Makes a lot of extra fine quality sorghum. Very popular.

Price on Sorghum Cane: 1 lb., 25¢; 5 lbs., \$1.00; post-paid. Not pre-paid: 5 lbs., 75¢; 10 lbs., \$1.00; 50 or more lbs., 9c per lb.

RAPE

GENUINE DWARF ESSEX

The Pasture Crop That no Hog or Sheep Grower Should Be Without

Rape, Rape and more Rape is what state agricultural colleges recommend to hog and sheep men. They urge the use of it very strongly because Rape helps to cut down the cost of production. It is fine for all kinds of young stock. Builds strong, big, healthy frames and bodies. Cuts down on grain rations. Gets the animals ready for market in shorter time.

SECRET OF RAPE'S VALUE

This crop contains an unusually large percentage of digestible protein. Analyzes as high as 37 per cent of this expensive food element. Many farmers pay out hundred of dollars for protein in the form of tankage and other concentrates. You can save a lot of cash on those feeds by growing Rape on your farm.

Rape is also an extra heavy producer. Yields up to 12 tons of green feed per acre on good rich land. Think of what that means to a farmer. It would cost him a lot of money to buy that much protein.

HOW TO HANDLE RAPE

Crop has leaves similar to cabbage leaves, but does not head. Can be used only for pasture. Will not make hay. May be sown with oats, often seeding after oats are up, or may be sown alone. Six to seven pounds per acre usually sown. May be seeded from early spring until about July. Can be pastured six to eight weeks after sowing. Some farmers have two fields of it and pasture one while the other gets a fresh start.

SEED QUALITY IMPORTANT

There is an annual or common Rape that will not give you much satisfaction. You must have the genuine Dwarf Essex variety. That is the only kind we handle. Seed must also be of high germination and thoroughly cleaned. You will find our stocks bright and fresh and first class in every respect. See page 42 for prices.

SOY BEANS

A BIG MONEY CROP FOR SPRING PLANTING

Soybeans, Soybeans and more Soybeans seems to be the call of the American farmer. There are excellent reasons for the great increase in Soybean growing. As a cash crop they are far superior to oats as the beans produce 20 to 30 bushels per acre, worth \$1.75 to \$2.50 per bushel. Soybeans are soil builders, too. They make fine hay, equal to Alfalfa. Soybeans in corn for hogging down is one of the most economical means of producing pork. Inoculate Soybeans.

Superior Quality Seed—Best Standard Varieties Specially Priced for this Great "1/3 of a Century Sale."

DUNFELD

A bright pure yellow bean. Heavy producer of mature beans. Makes a very fine hay variety and for hogging down. This is one of the newer varieties developed by the Iowa Experiment Station. We consider this one of the best all purpose beans and recommend it to you highly. Our stock is the finest Soybeans we have ever seen. But order them early.

MANCHUS

Another excellent all-around bean. Well known to most farmers and recommended by County Farm Advisors. Light yellow bean with dark seed scar. Heavy producer and strong grower.

MORSE EARLY GREEN

Especially fine for hay in all sections and good seed producer in southern part of Iowa. Beans do not shatter readily. Makes a fine growth of vines. Very popular.

EARLY BLACK WILSON

Small seeded black bean. Very nutritious. Becoming very popular.

VIRGINIA

Slender stems. One of the best hay beans. Small brownish colored seeds. Takes fewer pounds per acre. Adapted to practically every soil.

BLACK EYEBROW

A mottled brown seed. Grows 38 to 40 inches. Matures in about 120 days. Good for hay or beans.

MIDWEST OR HOLLYBROOK

Heavy seed producer. Also fine for hay. Matures 120 days. Very desirable for hogging down.

ITO SAN

Best of the earlier varieties. Stalks shorter and beans a little smaller. Color yellow. Grows very erect. Bears large quantities of beans. Excellent for north or where early variety is desired.

See Special Sale Prices
on page 42.

CENTURY SALE**

Severely

VETCHES

SAND, WINTER OR HAIRY VETCH

A legume. A soil builder adapted to all soils. Especially good for poor, sandy soils. Not sensitive to acid. Should be inoculated. Makes excellent feed, high in protein. May be sown in spring or fall. Lives over one winter. Sow 20 to 25 lbs. per acre. 50 lbs. to bu. Use for hay or plowing under.

We have assembled for this great sale event as fine a quality of genuine Sand Vetch as we have ever handled. Fresh, live seed. Recleaned, tested and guaranteed. Don't confuse this with common Vetch, as it is far superior.

Refer to our Wholesale Bedrock prices on page 42.

SPRING VETCH

One year crop. Can only be sown in spring. Should be sown early especially in south, as it needs a cool growing season. Seed larger than Sand Vetch. Takes about 40 lbs. per acre. Inoculate for best results. Extensively used where early crop is wanted for feed or plowing under. Feeding value very high. Also a good soil builder. Can give those who order promptly an exceptional value in Spring Vetch. See price list for quotations.

CANADA FIELD PEAS

One of the best crops available for real early hay, pasture or green feed. Sow real early. Cover fairly deep. Some oats usually sown with it. Pea hay is high in protein. Feeding value very high. Hard to beat for an early crop. We have the genuine White Canadian Peas for you now. Prices very low. We save you good money on Field peas of fine quality. See price list.

COWPEAS

A Legume of High Merit

They are one of the greatest annual soil building crops. A crop of cowpeas plowed under makes quickest improvement in soil fertility. Soybeans may be used in the same way.

Considerable soil fertility is left in roots and stubble, especially if seed is inoculated before planting. For hay or green manure use 1 1/2 to 2 bushels per acre. Can be grown in corn in place of Soybeans. Do not plant before corn planting time.

HIGH GRADE SEED

Our customers, both new and old, will be delighted with the quality of our Cowpea seed. It is bright and clean and high germinating. We have priced this stock as low as we can possibly sell seed of such high character. See price list on page 42. Also see page 39 for special premiums to new customers.

WHIP-POOR-WILL

An early maturing variety of cowpeas about 70-80 days. Very, very popular. Makes a heavy growth of foliage. Rather a bushy variety. Our trade takes more of this kind than all other varieties combined. Hard to beat for a general purpose pea. We recommend it as one you will be well pleased with.

NEW ERA

Earliest variety of cowpeas. A favorite in the northern states. Often planted after grain harvest, for plowing under in fall. Upright growing and prolific. Seed smaller in size than the average. One bushel per acre makes a good seeding.

MIXED COWPEAS

Extra heavy growth can be secured from mixed peas. When large yield is desired for pasture or plowing under they make a desirable seeding. Mixed seed can be had at somewhat lower price. See price list.

Method Of Preparation

SEED SECURED FROM BEST FIELDS

The preparation of our seed corn begins with field inspection. Only the best fields are selected. They are chosen for yield, quality and maturity. All states are carefully tested. Sorting then takes place. Poor ears are discarded. Ears kept are tipped and butted. Careful shelling next takes place. Then mechanical grading. All seed corn goes through this grading process twice, often three times. Another test is made. Each lot tagged and labelled. It is stored properly. It is shipped to each customer with a guarantee of satisfaction. Must stand up to your test. Return it and get your money back if not pleased in every way. Our aim is more and better corn per acre.

We can give but a very limited description of varieties here. Fuller description will be found in our general 132 page catalog. A copy of the same will be sent free to all wishing one. Mail the enclosed post card, without a stamp. We pay postage. Tell us what variety you are interested in. If you want to buy at these prices however, order from this special catalog.

Main Crop Yellow

Clarinda's Big Perfection. A large eared, yellow dent, somewhat rough. A great favorite with our trade. Combines the best qualities of leading varieties. Shells out large percentage. Broad, thick deep kernels that have a slightly wavy cast on the side. A vigorous grower. Early for such a fine large variety. Matures in around 110 days. Unquestionably a leader.

Pride of Iowa. The biggest selling variety we have. Similar to Reid's Dent. The grains are deeper and a bit rougher. The ears are larger. Ranks at the top as a yielder. Produces remarkably fine solid corn. Cob small considering size of the ear. Fills out well, shells out heavy. We recommend it highly. About 110 days.

Krug's Dent. An earlier variety but a phenomenal yielder. Made highest yield in test of 118 varieties. A cross of Gold Mine and Reid's Dent. Good sized ears and lots of them. Produces lots of bushels of fine quality corn per acre. 100 to 110 days.

Improved Leaming. A good producer on all soils. A tried and tested variety for over a century. Well filled ears. Deep broad grains. Medium sized red cob. Shells out well. Often used for ensilage in northern states. Quite early. Matures in 110 to 120 days.

Improved Reid's Dent. A superior strain of a well known variety. Solid compact ears, 9 to 13 inches long. Grains quite deep and set close. Straight rows well filled to the end. Great improvement over old Reids. Rich golden color. Small cob and shank. Feeding quality of this corn very high. A general favorite. Season 100 to 110 days.

Legal Tender. A pure yellow corn with deep grains and small red cob. Ears extra sized. Has yielded 90 bushels per acre for John Hess in Central Iowa. Produces exceptionally well. Abundant foliage. Excellent for forage. Easy to shuck. A variety that will please you. Around 110 days maturity.

Medium Early Varieties

Berry's Golden Dent. An early yellow dent 90 to 100 days. Large ears for early variety. Fairly smooth. Well filled. Similar to Reid's Dent but earlier. Sixteen to twenty rows. Much heavier yielder than Pride of the North. Medium height stout stocky stalks. This variety is easily a leader in its class.

Iowa Gold Mine. Another fine medium early variety. About a 100 day corn. Deep yellow grain, small cob. Always gives satisfactory results. Sold under various names by different seedsmen. Those wishing a medium early heavy yielding corn will make no mistake in selecting this variety.

Early Yellow Dents

Pride of the North. Especially recommended for northern customers and those wanting early feeding corn. Maturity about 90 days. One of the finest pure yellow early dents to be had. Medium sized solid well filled ears. Stands up well and yields surprisingly well.

Minnesota No. 13. Also in the 90 day class. Very popular; eight inch ears, often two on a stalk. Stalks quite leafy. Does well even under unfavorable conditions. One of the best producers in its class. We always have a big demand for this excellent variety.

Other Excellent Early Types

Yellow White Cap Dent. We recommend this highly. A 90 day type. Nice deep kernels, sides medium yellow. Caps or tops of grains white. One of the finest early feeding varieties in existence. The kind you get enthusiastic about. Heavy producer of fine solid corn. You will be exceptionally well pleased with this one.

Golden Cap. Grains a cherry red color with yellow top or cap. Very fine appearing. Yields very heavy. Grain a little softer than average. Ears well filled. Matures up to 100 days. One of the best early feeding corns you can plant. Great favorite with stock men. Adapted to most any section of the corn belt.

White Cap Red Dent. Similar in nearly every respect to Golden Cap except color of cap is lighter and a little earlier.

Up-to-date Calico. This is the famous "Speckled" corn that has been popular for so many years. A fine feeding variety. Various strains of Calico on the market. We consider this the best. Excellent yielder, good sized ears, medium deep grains. Matures in 100 days. We seldom have enough of this variety to fill demand of our trade. Order it early.

BERRY SEED CO.

CLARINDA, IOWA

**ALL BERRY SEED CORN
IS UNDER PRICED
at \$2.75 Per Bu.**

This special catalog gives out prices on all seed corn. They are below our regular quotations. To buy at these prices you must order from this catalog.

IMPROVED WHITE VARIETIES

White Wonder. Largest eared and heaviest yielding white corn. Ears grow 12 to 14 inches long. Good sized grains fairly rough. Matures a solid ear, and lots of them. Strong vigorous stalks. Outyields any other white corn we know of. Usually exceeds expectations of the grower. Has out-yielded other white varieties by as much as 30 bushels per acre. Around 120-day maturity.

Silver Mine. The most popular white corn we have. Pleases all who plant it. Does better on poor land than other varieties. Yields exceedingly heavy on good soil. Pure white grain and cob. Medium rough. High percentage of shelled corn stands fairly thick planting. Maturity about 110 days. We sell more of this than any one other variety of white corn. It will please you.

St. Charles White. The famous ensilage corn. White grain, red cob, clear color, large ears. A very heavy cropper. Makes quite a tall growth. Broad, succulent leaves. Used extensively for ensilage even in northern states. Produces 40 to 50 tons per acre when grown for this purpose. Grown also for mature corn. Makes high quality white stock.

Snow Flake. Large white corn. Comes between Silver Mine and White Wonder, about 115 days. Large, long ears. Medium depth grain. Moderately rough. Wonderful yielder.

Boone County White. Another good white variety. Ears somewhat shorter than Snow Flake, but larger around. Deep grains. Strong grower. 110 to 125-day variety. Not adapted to north. Peaky white color.

Silver King. Very early white. Also known as Wisconsin No. 7. Best early white. Very good yielder. Medium sized grain. An excellent choice for those wanting an early white variety. Similar to Pride of the North.

EXTRA EARLY VARIETIES

Minnesota King. A cross between a dent and a flint. Large, broad kernels, slightly dented. Deep, golden color. Eight rowed. Withstands very unfavorable conditions. This in our opinion is one of the most valuable of the extra early varieties.

Longfellow Flint. Fine 8-rowed yellow flint. Long, straight, slender ears. Large, wide kernels. Small cob. Very prolific.

Silver Triumph. An excellent white flint. One of the best. Long ears often two on a stalk. Grows good sized stalk. Can be planted close and produces a lot of corn per acre. Fine for those who want real early yield. Can be planted quite late.

Sanford's White Flint. Very similar to Silver Triumph.

**How Berry Extra Select
Ear Corn is Selected and Prepared**
**Only the Finest
Ears Are Chosen for Ear Corn**

When you order a crate of our ear corn you get the cream of the crop. Mr. A. R. Gorton who has been chief of our seed corn division for years, personally superintends the selection of our ear corn. You can absolutely rely upon his ear corn. We sell thousands of crates annually and it is a rarity if anyone is not highly pleased. The exceptions are usually due to an occasional shipment damaged in transit and, of course, any complaint is promptly adjusted.

To make our extra select ear corn, the ears must be properly proportioned for the variety selected. They must be well filled with straight rows. Ears must be bright, solid and clean. In short they must be first class and of the highly productive type.

Ear Corn Supply Limited

To make the standard above naturally means that only a small part of the crop will make the grade. This automatically puts a very strict limit on the supply. All orders for ear corn should be sent early. Our shelled corn will probably produce as large a yield as our ear corn, but if you wish the finest you can order a crate or two of our Extra Select ear corn. Each crate holds 70 lbs. net weight ear corn. The price on our ear corn has been greatly reduced for this "Third of a Century Sale." Order now from this book to get these low prices.

Special "Get Acquainted" Offer on Making More Money from Oats

BERRY'S GREAT NORTHERN

The King of all Our Heavy Varieties

The unquestioned leader for production and quality. An erect grower with straw stiff and strong and of good length. A large spreading head filled with extra big kernels. Lots of meat and therefore lots of feeding value in this grain.

A prolific stooler. Strong root system. A rapid grower. Medium maturity. Our customers often invite us to drive long distances just to see their fields. They are proud of their Great Northern and they have cause to be. They are a wonderful sight and they turn out just as wonderful as they look.

Northern Grown Seed

Northern grown stock invariably makes the largest yields and finest quality of grain. We secure this kind of seed for you so that you may have the finest and best obtainable. This seed is of course re-cleaned, graded and made into a first class seed product. Sold subject to any test. Return them and get your money if you are not pleased. You are getting value-plus in all of our seed grains and in our Great Northern you get our finest. The kind of seed that makes oat growing most profitable.

BETTER SEED BRINGS LARGER PROFITS

Thousands of dollars in extra profit could be realized by American farmers by sowing better seed oats. Seed has a much larger influence on yield than many people realize. Increases of 20 per cent and often 40 per cent are secured by using better seed. The stocks of seed oats that we have assembled for you this year are carefully selected, cleaned, and graded stock. Plump solid seed, grown under conditions that produce the best seed. A few extra cents spent for such seed means extra dollars in profits. Prices are low, quality considered.

CANADIAN GROWN REGENERATED SWEDISH SELECT

These heavy yielding oats are known nearly everywhere that big heavy oats are grown. They are heavy producers of high quality grain. A white oat, medium early. Far superior to the old Swedish Select. Yields up to 100 to 140 bushels per acre reported on this variety. Seed of the type we have for you generally retails for very fancy prices. You will find the quotations on our price list placed at the lowest figures that such seed can be sold for.

We want you to sow some of these heavy seed oats of ours, and really learn what a difference in yield can be obtained by using better seed. Sow them in comparison with other varieties. Keep track of costs. The little extra money you spend for such seed comes back many times over in the way of better yields and quality. You are simply losing money when you sow inferior or run down strains. Our Canadian Grown Regenerated Swedish Select seed is first class stock and we can recommend it as a highly satisfactory and profitable variety to grow. See price list.

FULGHUM

One of the newer varieties for the north. A record breaker everywhere. A yellowish oat, quite large growing on good length stiff strong straw. More resistant to smut and other diseases than the average. It has outyielded during the past 6 years every oat it was grown with such as Silver Mine, Khersons, Green Russian and even the Swedish Select.

This oat is adapted to any section of the country. In the south it may be grown as a winter oat. It is as a spring variety in the northern states that it has made such an enviable record. This oat should be sown early for best results. On account of not growing so tall as the real large varieties it makes a better nurse crop for grass and clover seedings. You will find this oat a winner and a leader in the class of early oats. Larger grains, more bushels per acre, and more profit. We guarantee that you will be satisfied with our re-cleaned quality seed. Our prices are made to attract new friends and customers and it's the satisfaction you will get out of our seeds that will bring you back again for more.

GOLDEN RUST PROOF

A yellow oat, medium early. A wonderful yielder. Has produced up to 125 bushels per acre. An excellent rust resister. Does unusually well under unfavorable conditions. Stiff straw, narrow leaf, stands up well even on rich land. Well filled meaty grains. Fills better than the average, especially under unfavorable conditions. If you have trouble growing a good crop of oats try our Golden Rust Proof. Break away from your same old seed this year. Join the Berry family and use some of our improved seed.

New ALBERTA

A wonderfully fine big heavy northern grown oat. Large plump kernels, full of meat. Tall stiff straw. Stands up well. Tall for such a heavy variety. A maturer early and an oat that bears astonishing crops of high quality grain. A stronger grower of our most profitable varieties. Weighs out heavy. One seed. Consider your purchase of these oats an investment, not an expense. It pays handsomely and makes farming more profitable.

The seed will please and the prices as given on page 42 will certainly save you some money, considering quality.

Buy Better Seed for Less Money Prices Extremely Low! Quality Considered

New Iowar

One of the newer varieties of early oats. Similar to the Kherson. Just a little larger grain and a couple of days later. It grows a longer straw and is generally considered a better yielder. They were originated at Ames, Iowa, from a sixty-day variety. The fame of this variety spread so rapidly that we were literally forced to handle and sell it. Our farmers claim it is the best early oat they have ever grown. Outyields both Iowa 103 and 105.

The hull of this variety is rather thin. Grain has a small, black awn. Average maturity at Ames, which is in central Iowa, was July 17th. We have some very fine seed for you and want to supply your needs.

Silver Mine

A white oat that is popular over a wide area. It deserves this popularity, for it combines an oats of superior quality with heavy yields. Medium early, ripens evenly. Medium length straw. Not very apt to lodge. Soft hull, large meaty kernels. They make fine feed.

Our seed stock is clean, bright and heavy. All of these fine characteristics of the Silver Mine makes it a desirable and profitable variety. Seed of this kind is just another one of those possibilities for making more money. Let us save you some money on quality stock.

new HULLLESS

The Oats that are all Meat and no Hull

This is a new oat to many and yet has been grown for many years. We have handled this only since an improved type was developed that has proved a winner. Our Hullless Oats are excellent yielders, and of highly satisfactory quality. The grain of these oats might be compared to rye only it is softer. They certainly are fine feed. Consider that ordinary oats are about 30 to 40% hulls which have but little feed value and you will recognize the merit of this variety.

We treat our Hullless Oats before shipping with copper carbonate to prevent smut. This treatment will not do so well for hulled oats, as the dust does not get to the kernel. You get from this seed the finest and best prepared hullless oats on the market. Grow some of them. They will be a revelation to you. See price list.

Superior Iowa 105

A real early variety. Medium size, light yellow grain, well filled, plump and heavy. Stands up better than any other variety on extremely rich soil and under adverse conditions. It yields astonishingly large crops, 100 to as high as 126 bushels per acre being reported.

This oat is also an Iowa variety, being originated by Prof. S. C.

Burnett of the Iowa Experiment Station at Ames. It occupies a high rank in the favor of farmers in many states. It has proved itself adapted to all sections where spring grains are grown. Southern farmers like it because it yields well and makes a nurse crop of the finest kind.

White Kherson

A very early white oat. Grains medium size. While not a large variety it is an extra heavy producer. Stands up on rich, strong land. Matures early, getting out of the way of unfavorable conditions such as blight and rust. Stools well, which, together with smaller size of grain, makes 2½ bushel per acre a good seeding. Makes a fine nurse crop for grass and clover seedings. Wherever conditions require an early oat our selected White Khersons give satisfactory results.

OUR SEED MOST DESIRABLE

This carefully cleaned and graded stock is a far superior article to what many farmers sow. If you want maximum yields you must sow superior seed. Such seed is worth a lot to you. It would pay you to pay more than we ask, if that were necessary to get such seed. Our prices are lower than others. Let us help you get better oat profits this year.

Early Champion

This also is an extra early variety. Sometimes called the "Fourth of July" oat as it is out of the way very early. A remarkably fine nurse crop. Many dairy men grow this variety and feed it in sheaf. It is a good yielder. Is adapted to practically any type of soil and exceptionally good for clay or light soils. Produces better on soils of low fertility than any other variety.

These Early Champions are deserving of widespread use. While they will not yield equal to the larger later varieties they will, under conditions existing on many farms, be extra profit makers. Our seed is all reclaimed graded stock. It is carefully prepared and a product that will satisfy you. Start this year with better seed. Take advantage of our sale prices and order from this special catalog.

OUR BARGAINS MUST BE THE LARGEST OR YOUR MONEY BACK

The Key To Better

SPRING GRAIN PROFITS

Barley has unquestionably proven its superiority over other spring grains as a feed producer. No other cereal excepting corn will yield as many pounds per acre. It makes the extra fine feed. The acreage of Barley has increased rapidly in the past few years. Last year there was more Barley sown than ever before and 1929 will show a big increase over 1928. With improved varieties, such as we offer you here, you can get extra profits, for they are extra heavy producers.

CHAMPION BEARDLESS BARLEY

This is the most popular variety we have. The tremendous demand for it exhausts our stocks every year before the seeding season is at hand.

Having no beards it is a very pleasant grain to handle. The straw has greater value. It is a very early variety and an extra heavy yielder. It is the kind of a crop farmers get enthusiastic about. A field of this Barley is a beautiful sight. The heavily filled beardless heads droop slightly with their rich loads of muscle-building, bone-developing and nerve-forming foods. In harvest time it turns out just as good as it looks.

Good Supply on Hand Now

We contracted the largest stock of Champion Beardless that we have ever had for this greatest of all seed sales with which we are celebrating our thirty-fourth anniversary. And we have priced it at a figure that makes every penny count. We ask all who want this wonderful Barley to place their orders early, for while our stock is large now it will not last throughout the season.

WHITE HULLESS BARLEY

The kind that has no hulls or beards

This remarkable variety shells out a grain like wheat. Hard, plump, solid grains a little larger than wheat kernels and lighter in color. Makes one of the finest feeds you can use. Each grain is packed with life-giving, healthful food elements. Makes extra fine hog feed. Like Champion Beardless, it is early. Gets out of the way of unfavorable conditions that often harm small grain late in the season. White Hulless is also an excellent drought resister. The leaves are broader than on other barleys. It is often used as an early hay crop.

Extra Profits

Farmers who are the first to grow this variety in their neighborhood usually sell most of their first crop at a premium to their neighbors for seed purposes. Many do not care to sell any of it, for they find it an extra good and economical producer of pork. White Hulless makes heavy yields and that means extra profits, too.

Sowing high-grade re-cleaned seed such as we have contracted for you is an assurance of the most satisfactory results possible. Seed weighs out 60 to 63 pounds to measured bushel, but quotations are on the same basis as other Barley, viz: 48 pounds to bushel. Our large 132-page catalog tells more about this great variety. Use the enclosed postcard and get this catalog free. Order from this catalog, however, and get the advantage of the cut prices on page 42.

VELVET BARLEY

The Barley with Beards Like Silk

One of the newer varieties that is taking rapid strides to the front and promises to stand at the head of the list in another year or two. As a yielder it doesn't take a back seat for any variety. It usually tops the list in any experiment undertaking.

While this variety has beards it is entirely different from any of the old bearded sorts. You may know something of the rough, "sticky" beards of those old kinds. The beards on Velvet are as smooth as straw. No barbs at all. It's just as pleasant to handle as the beardless kind.

Beards Claimed an Advantage

The presence of beards seem to act as a protection to the grain and is especially helpful under hot, dry weather. This may be one of the reasons for its heavy yielding record. The grain resembles the Champion Beardless. This variety is unusually resistant against disease. There is good money, too, in selling this Velvet for seed while the supply is still limited. We recommend it to you as a money-maker second to none. Now is a good time to start with this variety, while you can get our special sale prices.

ODERBRUCKER

This is one of the older varieties of Barley, but an improved type. One of the heaviest producers. A grain of high feeding value, high in protein. Very early. Disease resistant. Strong straw. An excellent nurse crop for grass and clover seedings. This Oderbrucker is always on the job producing its extra rich feed in great abundance. On account of larger supply the price is lower and makes a very economical seeding. Around two bushels to two and a half bushels per acre is the general seeding.

Start getting better grain crops this year. Barley will do the trick for you, if you use improved re-cleaned seed of the best varieties. You will find our stocks of the highest types and prices are sale prices.

Spring
Grain
Profits

SPELTZ

Also Called Emmer

This is a most remarkable grain crop. It is a very hardy spring grain crop, a good yielder and a grain of very high feeding value.

Speltz resembles barley somewhat, only the grain is larger and broader. The hull or shuck is not so tightly attached to the kernel. When you remove the hull you find two kernels similar to rye. It makes wonderful feed. Both the husk and the kernel contain rich food elements. Plenty of protein and mineral that make it one of the finest grains to feed.

Other Valuable Characteristics

Speltz is the best drought resisting grain in this country. It outyields practically every other small grain crop. It matures very early. It stands up remarkably well and seldom, if ever, lodges. That makes it an admirable nurse crop for grass and clover seedings and also makes it a grain that can be grown on rich land.

It does not require rich land, however, for Speltz, as it makes very good crops even on poorer soils. The crop can be sown as early as the seed bed can be prepared. It will stand more frost than other spring grains. Sow 2 bushels per acre. Can be sown with a drill or handied like any spring grain crop. Speltz also makes good hay when cut green.

Heavy Demand for Speltz

We are selling more Speltz every year. Farmers who are looking for a grain crop that is more profitable than common oats are enthusiastic about Speltz. While they usually have an opportunity to sell their first crops for seed, they are loathe to part with it after they learn its excellent feeding value.

The disease resistant qualities of Speltz is another point in favor of this remarkable grain. You may have heard about this grain before. Now is an excellent time to start with it.

Price Very Low on Fine Quality Seed

Our Speltz seed is another of the famous seed values that is making our "One-third of a Century Sale" such an important chapter in the history of the seed business. Bright, plump, re-cleaned, high germinating seed from heavy producing strains makes a seed value that is bound to satisfy. A high-quality product always satisfies.

We are selling our Speltz seed on the close margin that is creating such a sensation in the seed world. What we lack in percentage of profit we figure will be made up by a tremendous gain in the volume of sales. See price list for wholesale quotations.

Buy Better Seeds for Less Money

Some will tell you it can't be done, but here in our values is the indisputable proof that we are doing it. When you receive your shipments from us you will be absolutely convinced. If you are not you can return your shipment and get your money back, plus freight, and you are out nothing.

The first pages of this catalog explain why we can make big money-saving offers. All these other pages show you that we do actually make your seed dollars 10 per cent to 25 per cent bigger. The quality of the shipment will convince you that you couldn't get a similar value elsewhere for the money.

Buy these special values that we, as farm seed specialists, have prepared for you with the greatest care. They are even better than usual in this Thirty-fourth Anniversary Sale. New customers should study special premium list on page 39.

CENTURY
SALE

SPRING WHEAT The Famous New Marquis

This Wheat is being grown with wonderful success in sections where spring wheat is not ordinarily grown. It is earlier than most varieties and, therefore, escapes the unfavorable conditions that often damage later varieties. We handle only the best quality seed, which is an important favorable factor. Southern seed is not nearly so desirable although it can be secured at lower prices. We advise against using it.

Character of New Marquis

It is beardless or smooth-headed wheat. The kernels are short and very plump. Color quite dark and a hard variety. It stands in front rank as a yielder, and is one of the finest milling varieties. The seed we have is truly beautiful stock. There is a great difference between the results you can secure from this seed and most other spring wheat. Sow it as early in the spring as possible. Use 1 1/2 bushels per acre. Our New Marquis is one of those better money-making spring grains. Don't continue with unprofitable kinds. They lose you money. Invest in better seed. Our prices are very low for such fine re-cleaned northern grown seed. Quality considered, we always save you money. Buy during this value-giving sale.

SPRING RYE

This crop, while new to some, is a very fine grain crop. Makes excellent yields on all soils and one of the finest spring grain crops for poor land. Grains almost identical to winter Rye. Growing crops look alike. You sow spring Rye like any other spring grain crop. Use about 1 1/2 bushels per acre. Sow as early in the spring as seed bed can be prepared. Crop very hardy. Stands lots of frost damage.

Value of Spring Rye

Spring Rye grows a good length straw. Yields reported up to 40 to 60 bushels per acre. Also used extensively for hay and pasture. Makes an excellent combination with Canada Field Peas or Vetch. Can be pastured for a while and then left for a grain crop. When you have a piece of light sandy soil to which you want to add humus in order to make it more fertile and to increase its water-holding capacity, a good crop of green spring Rye plowed under will do a lot of good. Our seed stock very fine and prices low. See page 42.

NEVER BEFORE SUCH VALUES

In the face of shorter crops and higher markets we are cutting our quotations to prices that only a leader dares to make. Considering market conditions and quality these prices are lower and values greater than any we have ever offered before. This is the policy we maintain throughout this book in our great drive to add 100,000 new customers to our host of satisfied seed buyers. It is a new-customer "campaign" the like of which has never before been attempted and will result in savings to the American farmer that will run into hundreds of thousands of dollars.

LOT BEAUTY \$5⁰⁰_{Bu.}

F. O. B. Clarinda—\$5.15 F. O. B. Chicago
Pure Biennial White Sweet Clover

A rare bargain in very fine quality. A value that is "top-notch." Seed that will satisfy critical buyers. Stock that will give the best possible assurance of success. Nice big plump seed. Very good color. Double cleaned. Thoroughly scarified by our modern method. The germination and purity excellent. The color is very good. It is a target in value-giving that is beyond the range of the average dealer.

We guarantee you can't duplicate it. If you can match this quality for the same price anywhere we will not ask you to keep our seed. We will have it returned and refund your money, plus freight. No quibbling about it. Your judgment will decide the matter. Could any proposition be more reasonable or fair?

You'll never fully realize how much seed value can be packed in a dollar's worth until you get some of this Lot Beauty. It is sold subject to any test you want to put it to and guaranteed to satisfy in every way. This lot of seed is most deserving of its name, "Beauty." You'll be proud to sow such seed. You will know when you see it that you have practiced true economy in securing such fine quality and at such a low price. If you paid \$1.50 to \$2.00 per bushel more you would still be satisfied, for it has the quality that produces the best possible results.

LOT PREMIUM \$4⁷⁰_{Bu.}

F. O. B. Clarinda—\$4.85 F. O. B. Chicago
Contains a Small Percentage of Alfalfa

Here is another matchless value that makes your seed dollar about 25 per cent bigger. This is a very nice lot of seed. Good color and purity. We secured this lot for considerably less than its practical value because it had a small percentage of Alfalfa in it. That doesn't hurt the seed. In fact, the majority of farmers like a little Alfalfa in their Sweet Clover. However, technically speaking, the Alfalfa cuts down on the purity test. Sweet Clover, for example, that was 99 per cent pure would only test 94 per cent pure if there was 5 per cent Alfalfa in it.

Very Free of Weed Seed

It is free of dangerous weed seed. Any farmer who does not object to a small percentage of Alfalfa will surely be completely satisfied with this Lot Premium. It enables you to get a fine quality at a lower price than would otherwise be possible. Sowing such seed is an excellent way of starting Alfalfa on your land. We had a similar value a few years ago. It surely sold fast.

Special Lot Challenge \$4⁰⁰_{Bu.}

A MASTERFUL ACHIEVEMENT IN VALUE GIVING—A CLIMAX—A BARGAIN
AMONG BARGAINS—A RECORD-BREAKER

See Proof in Sample Enclosed

This lot is a challenge. A challenge to all the world to try to give you as much value for the money as is obtainable in this lot. Look it over. Check it up. Compare our sample. Consider its quality. Bear in mind it is scarified by our modern super scarifier. This seed is clean. Triple cleaned. It has good germination. It is not quite equal to our fancy grade for color, but for practical purposes it will satisfy. It is clean and it will grow. It's hardy, home-grown seed. That is all most farmers want.

Lot Challenge Represents Thrift and Economy

Those who want the extra bright looking seed should buy our Extra Fancy quality of a lot like Lot Beauty. To those, however, who do not object to a little off color just so you get seed that can produce satisfactory results, should order Lot "Challenge." You know from experience that there can be a lot of quality beneath a rugged appearance. A fellow in overalls may do even more for you perhaps than one who is all dressed up. That's really what Lot Challenge is—a reliable and dependable value dressed up in overalls.

Examine Sample Carefully

Compare it with others. You'll be surprised to find that dealers' prices on seed very little superior will run \$1.50 to \$2.00 per bushel higher. These are facts. Investigate. We secured it direct from producing sections, buying at low cost in great volume. The sale is made direct to you. Only one small profit. Naturally our prices run lower.

Lot Challenge Secured Especially for This Sale

We assembled a large quantity of this seed and carefully prepared it for this unrivalled "One-third of a Century Sale." It is offered to you as one of the crowning events. You save money on every item you may buy from this catalog; in this value you get still an extra saving. We took a low price and made it still lower. There isn't a finer "friend-making" value in this book than Lot Challenge.

Order it now while we have plenty of it. For Chicago shipment add 15c a bushel.

LOT GOLD \$5⁴⁰_{Bu.}

The Very Finest Quality of the Yellow Biennial
Sweet Clover

In this lot you find quality supreme. The largest berries, the highest color, the strongest germination and excellent purity. It is simply A No. 1—the pure quill. No matter how particular, critical or exacting you may be, this seed will please you. We can't get it any finer. You might pay \$2.00 or \$3.00 per bushel more for your seed, but you wouldn't get it any better. It is double cleaned, scarified and put into first-class condition from every standpoint.

Extra Value of Yellow Biennial

This variety is preferred by many to the white. It is finer stemmed and more leafy. Therefore, it makes better hay. It does not grow as tall and coarse as the white. It is about 10 to 14 days earlier than the common white. It is unquestionably a superior kind for hay and pasture. Probably just a shade under the white as a soil builder, but it runs a very close second.

Seed Supply Short

The stocks of Yellow Biennial Sweet Clover are considerably lower than last year. Seed markets much firmer. Prices are undoubtedly due for stiff advances before spring is at hand.

This Lot Gold is priced to save you \$1.50 to \$2.00 per bushel, quality considered. Very few dealers handle so fine and carefully prepared lot of seed as the strictly extra fancy Lot Gold. We guarantee satisfaction. If Chicago shipment is desired add 15c a bushel to above price.

GRUNDY COUNTY LOT EXCEL \$5³⁰_{Bu.}

A Smaller Variety of White Sweet

We can repeat for Lot Excel what we said about the quality of Lot Gold above. It is just as fine in every respect. This extra fine lot is priced for this sale down to the last penny. It is a lot that cannot be excelled for quality at the price. It cannot even be duplicated. We guarantee that. We'll take back our seed and refund your money if you can.

Cheaper to Sow Grundy County

This is a smaller seeded variety. There are more seeds per pound. When the common is sown at 15 pounds per acre, this is sown 10 to 12 pounds. A bushel of Grundy County covers 5 to 6 acres, as compared to 4 acres per bushel of the common. It is easy to see the seed is cheaper to sow.

It does not grow tall and coarse. Average height is 3 1/2 feet. Seldom grows taller. That really is tall enough. This variety is especially valuable where the common white grows real tall and coarse and rank. Many farmers who have grown both kinds are discarding the common in favor of the Grundy.

Grundy also ripens seed more evenly than the white, which is a great help when a seed crop is desired. It is about three weeks earlier than the common white.

Sale of Grundy Increasing Rapidly

This year is going to see the largest seeding of this variety ever made. The letters and orders that have already come in show that. We are prepared to take care of your orders, unless you delay too long.

In Lot Excel we are putting out a surplus of value that makes it a bargain, outstanding. You'll never go wrong in buying such quality at so low a price. If Chicago shipment is desired add 15c a bushel to above price.

Always Inoculate for Best Results

SWEET CLOVER Makes Good Farms Out Of Poor Ones

YOU CAN MAKE YOUR LAND PRODUCE MORE GRAIN PER ACRE

The more bushels per acre the lower the cost per bushel to you.

Sweet Clover is the most effective, quickest working, soil building force that nature has given you. Put it to work for you. Sweet Clover gathers enormous quantities of nitrogen from the air. It's root development is rapid. Those big, powerful roots go down deep and they go down quick. They break up hard sub-soils permitting good drainage.

They bring up plant food from depths that other crops do not reach and leaves it where other plants can get at it. When plowed under the Sweet Clover decays quickly adding humus, as well as fertility to the soil. It makes light soils heavier and heavier soils lighter. In short, it is a miracle worker as a soil renewer.

Increases in Yields

Twenty-five bushels more corn per acre after Sweet Clover is a common occurrence. Yields are frequently doubled. Increases in small grain production are just as startling. Potato yields increased 60 bushels to the acre. The facts may sound like exaggerations but they are truthful facts just the same. You almost have to use it to know about it. Once you get Sweet Clover started and learn first hand of its wonderful power you will be an enthusiast of the highest order. Man, its one of the greatest money-making crops you can grow. It's been a life saver for thousands of farmers. It has turned aside the tide of discouragement and brought new life and satisfactory profits in its place.

Other Values of Sweet Clover

Sow 15 lbs. per acre with spring grain or on winter wheat. It generally makes a good crop of fine hay the first year. It is fully equal to Alfalfa. Or if you don't need the hay it gives an abundance of pasture. Second year it makes two hay crops or a hay and a seed crop. Or one crop for hay and one to plow under. Many plow under the first crop the second year just before corn planting time and get double quick results in that way. As a pasture it ranks second to none. Takes care of more stock per acre than any other crop. Feeding value extra high. Less danger of bloat than other clovers. Keeps stock sleek and fat. Reduces grain requirements.

We Are Sweet Clover Specialists

We sell more of it today than any seed house selling direct to farmers. Our sales run between 3,000,000 and 4,000,000 pounds of Sweet Clover seed per year. We have the best machinery obtainable for handling the seed. Our scarifying method is the newest and most efficient to be had. Old methods used by most seed houses are obsolete. We are recognized all over the United States as Sweet Clover specialists.

Unhulled Sweet Clover

\$1.90
Per Bu.

F. O. B. Clarinda; \$2.05 Chicago, 30 lbs. to bu.

The unhulled seed is the stock just as it grows on the plant. The hull still is on the seed. It has, of course not been scarified or the hull would not be there. Such seed is of slower germination than scarified stock. For a late spring seeding it is not advisable. It is better than scarified seed however for winter or early spring seeding.

The freezing weather breaks up the hull and softens the enamel on the seed. Then when good growing weather comes it starts to grow quickly. It has become well imbedded in the soil and is off to a good start. It is not, however, started by the winter thaws that are followed by hard freezes. Many early seedings of hulled Sweet Clover are destroyed in that way.

**PRICED
Exceedingly
Low For This
1/3 OF A
CENTURY
SALE**

Our Unhulled Seed is a Fine Product

Some dealers offering unhulled seed sell it just as it comes from the machine with perhaps a few sticks removed. Our unhulled is double cleaned with the same care that is used on the hulled seed. Therefore we offer you in our unhulled a high quality of seed. It will please any buyer no matter how particular. There is a money-saving opportunity in this seed. Compare values. Check up on us. We challenge the world on Sweet Clover values. More unhulled seed is being used this spring than ever before.

All Prices Good While Seed Lasts

The special lots described and priced in this catalog are offered for less than their actual values. Each one represents a supreme climax in price reduction. They are values that neither we nor anyone else can duplicate at this time. Therefore we ask you to buy now.

These super-values are made especially with the view of making new friends and customers. We know the quality will please you and bring you back when you want more. That's why we make these special prices now. Also we offer new customers additional incentives by sending anniversary gifts with orders. See page 39. Let us serve you this year and prove to you that high quality seed can be purchased for less money than you have been accustomed to paying.

Seed Potatoes

Grow More Bushels From Fewer Acres

Selected Northern grown seed potatoes are far superior to southern or home grown stocks. This has been proven hundreds of times in demonstrations and farm experiments in all parts of the United States. Nearly every experienced potato grower knows this. Knows that better northern seeds will bring him a much larger yield per acre. It may double production and the quality is far better.

You can buy the finest seed stock at very low prices during our "1/2 of a Century Sale." Now is the time to change your seed while prices are at their lowest points. Our seed is Red River Valley stock carefully selected, and is guaranteed to satisfy.

RED RIVER OHIO

Extra early. A good keeper. Light pink skin. Pure white flesh. Eyes near the surface. Very little waste in peeling. Vines grow upright, easy to cultivate. Tubers are in a compact clump making digging easier. Potatoes grow to good size. It is an old favorite variety.

You doubtless have grown Ohios before, but there are many who read this that have never planted as fine or as heavy yielding seed stock as our Red River Ohios. This northern grown seed will mature a crop about two weeks earlier than the average home-grown stock. You get quick-growing potatoes that make the heaviest yield and finest quality.

BANNER

A superior variety of medium late potatoes. Makes smooth, handsome, creamy white potatoes. Excellent table quality. Strong eyes set on the surface. Skin slightly netted. Splendid coozer. Remarkable disease resister and stands drought better than the average. Splendid keeper and an enormous yielder. This variety is a general favorite main-crop variety. You'll like them.

CARMAN NO. 3

Famous for its heavy yields. Produces very few culls. Skin and flesh white. Few eyes, which are shallow. No hollow hearts or dark spots. This, too, is a main crop variety. Carman No. 3 is one of our most popular varieties of the late type. Our seed stock will give you far better satisfaction than the average seed you might plant. It's an excellent variety.

RURAL NEW YORKER

A variety that has a host of friends. It's a dandy. A main crop or late variety. Very smooth. Shallow eyed. Produces heavily. Good drought resister. Highly prized for its excellent keeping qualities. Very choice eating stock. Get a start of this most desirable variety. We will send you selected seed. All northern grown. Produces bigger and better crops.

BERRY'S IMPROVED BONANZA

Here's something superior to the old Bonanza. A little larger, a better yielder. We consider this our best medium late red-skinned variety. Very white flesh of fine texture. Cooks dry and mealy. Vigorous vines. Best disease resister and withstands drought better than others. We consider it the best yielder, finest keeper and best shipper. Combines more good points than any other of its type. We urge you to include this in your order. Our prices low and quality high.

SPAULDING RED ROSE

Medium late. Color, dark red. Shape, long and large. Flesh very white and mealy. Heavy yielder. A hardy variety. Strong, vigorous foliage that resists disease and insect damage. Its heavy yields make it rank high in popular favor. A fine money-making variety, especially when high-grade northern seed is planted.

SIR WALTER RALEIGH

One of the chief main crop varieties in this country. Pure white in color. Round to oblong in shape. Grows to large size. Finely grained white flesh. This potato attains front rank with its fine quality and large yields. We always have a heavy demand for these.

All varieties are standard and first class. See price list for quotations.

BERRY'S GENUINE IRISH COBBLERS

These are potatoes that should be in every garden. It will produce more and better potatoes than many you have grown before. They excel in quality and yield the old Peachblow we used to handle. It is by far our most popular variety. If you want a potato crop to be proud of plant some of our famous Genuine Irish Cobblers.

Description

White skin and the flesh is pure white. Looks nice and is a wonderful eating potato. Cooks very dry and mealy. Its quality can hardly be excelled. Yields are astonishing. Early potatoes bring best profits with such heavy yields.

It is a smooth potato with somewhat deep-set eyes. Tubers quite large. Round to oblong in shape. The family will be delighted with their fine quality and for the same reason they are very popular with the trade. Be sure to include some of our fine Irish Cobbler stock in your order. We know you will be exceptionally well pleased.

All Our Potatoes Low

See page 42 for our money-saving sale prices. These quotations are made on the kind of seed stock we know will give you the highest type of satisfaction. We will order any seed returned that does not please in every way. Let us help you grow more and better potatoes on fewer acres.

GARDEN SEEDS

CANNAS

Give Tropical Effects

No home is complete without them. Set out in the spring. Dig up in the fall. Replant next spring, etc. We will ship you some very select stock. Our prices will save you money.

All Prices Postpaid

- 2202 Florence Vaughan. 4 1/2 feet. Green foliage. A renowned yellow Canna.
2203 King Humbert. 4 1/2 feet. Bronze color. Flowers measure 5 to 7 inches across.
2205 President. 4 feet. Green foliage. Color rich, glowing scarlet. Free bloomer and strong grower.
2210 Yellow King Humbert. 4 feet. Dark green foliage. Deep, rich yellow flowers, softly spotted with bright red. Very large flowers. One of the leading Cannas.
Above four varieties, 15c each; 3 for 40c; doz., \$1.40.
2201 Buttercup. 2 1/2 to 3 feet. Green foliage. The best dwarf yellow. Flowers a pure buttercup-yellow.
2204 Mrs. Alfred Conard. The large, exquisitely shaded salmon-pink flowers are produced in great abundance on robust, upright stalks. 4 feet.
2206 Richard Wallace. 4 feet. Canary-yellow flowers. Very floriferous. One of the best yellows.
2207 Statue of Liberty. 6 to 7 feet. Flowers blazing flame-red. The foliage is of a rich, luxuriant bronze shade. The leaves are larger than any canna we know.
2208 Winter's Colossal. 5 feet. Without a doubt the largest flowered canna yet produced. Flowers of vivid scarlet, sometimes measuring 8 inches across.
2209 Wyoming. 5 to 6 feet. Bronze foliage. True orchid-flowered variety. The massive orange-red flowers make a strong contrast with the rich, dark foliage. A striking variety.
Above six varieties, 20c each; 3 for 50c; doz., \$1.75.

Berry's Special Canna Offer

- 2215 One each of the above 10 superb varieties, postpaid, \$1.50.

Mixed Large-Flowering Cannas

- 2220 Our selection, 3 for 40c; doz., \$1.50; postpaid.

Canna Bed Collections

- 2225 For a 7-foot bed, 19 plants, 1 in center, 6 in second row, and 12 in the outside row. Best selected named varieties. Price for 19 bulbs, \$2.25.
2230 For a 10-foot bed, 37 plants—1 for center, 6 for second row, 12 for next row and 18 for outside row. Large flowering, selected, named varieties. 37 bulbs for \$4.00, postpaid.

Hints on Canna Beds.

If planted in circular beds put the taller ones in the center and lower growing varieties towards the edge. In rows the taller ones should of course be at the back. Some low growing flowers or plants along the outer edge make a very effective frame for the Canna bed.

MISCELLANEOUS BULBS

- High Quality Stock. Prices Postpaid
1445 Maderia Vine. Rapid grower. Light green, heart-shaped leaves. White, feathery, fragrant flowers. Strong roots. Each, 5c; 6 for 25c; 1 doz., 45c.
1425 Cinnamon Vine. Grows 30 feet in a single season. Glossy, heart-shaped leaves. Delicate white fragrant flowers. Dies down in winter but comes up again in the spring. Strong, healthy roots, each 5c; 5 for 20c; 12 for 40c; 25 for 75c.
1480 Tuberoses—Giant-Flowering. Annual Excelsior highest type of tuberoses. This "Mammoth Strain" is the 25c; doz. 45c.
1485 Caladium—Elephant's Ear—Annual. Most effective both as single plants on the lawn, massed in beds, or for margins of water. Leaves often attain a length of 3 feet by 20 in. wide. Bulbs can be stored in dry sand over winter. Large size. 15c each; 3 for 45c; doz. \$1.70.

Hardy Northern Grown

Save On Roses

The beauty of roses is one of nature's rarest gifts to mankind. Delicately shaded, delightfully perfumed and exquisitely formed, they make a flower that everyone loves.

The varieties listed below are selected for their beauty and their adaptability to the needs of our customers. The tea roses do best with some protection over winter, all other varieties are very hardy. The stock is strong and healthy and of the size that usually starts the easiest and gives the most satisfactory results.

The prices are low for the quality of stock supplied. Roses are scarcer than usual this year. Place your orders early. Late buyers should send in a second choice.

Hardy Hybrid Perpetual Roses

Your selection from any of these varieties, 50c each; 3 for \$1.00; 4 for \$1.30; 12 for \$3.50.

2100 Anna De Diesbach. Bright, clear pink, especially fine in the buds.

2101 American Beauty. The Queen of crimson flowers.

2102 General Jacqueminot. The flaming scarlet Rose of Romance.

2109 George Ahrends. Large pink flowers borne singly on the point of each stem.

2103 Frau Karl Druschki. Acknowledged by all to be the most perfect white rose.

2104 Paul Neyron. Bright, rosy pink. The largest rose known, often as large as a saucer.

2105 Ulrich Brunner. Cherry red, a rare color. Large petals.

2106 Soleil D'Or. Golden yellow shaded nasturtium red.

2107 Mrs. John Laing. Large pink flowers. Extremely fragrant, borne on long stems.

Hybrid Perpetual Rose Collection

To introduce the beauty of our Hardy Hybrid Perpetual Roses and acquaint you with the elegance of each variety we offer one each of the nine varieties postpaid for \$2.75.

Everblooming Hybrid Tea Roses

Your selection from any of these varieties, 50c each; 3 for \$1.00; 4 for \$1.30; 12 for \$3.50.

2111 General MacArthur. Brilliant crimson; splendid for bedding.

2112 Golden Emblem. Best yellow bloomer; blooms constantly.

2113 Gruss An Teplitz. Red rose in a class by itself, because it bears three times as many blooms as any other. Ironclad for hardness.

2114 Kaiserin Auguste Victoria. Pure white and a time-tried favorite.

2115 Killarney. The beloved Irish rose, especially beautiful in the bud.

2116 Mme. Edward Herriot. Buds are coral red and the open rose a lovely apricot.

2120 Lady Hillington. A fine, free-flowering rose. Has long, pointed buds. Colored a deep apricot yellow shading to orange.

2121 Los Angeles. The long, pointed buds open into beautifully formed flowers rich in fragrance. It is colored flame pink, toned with coral and shaded with gold.

2117 Ophelia. A delicate salmon pink toned with rose. A flower that excites the admiration of all who see it. Flowers open full and double. Blooms profusely all summer.

2119 Red Radiance. Pure red; foliage growth and habit same as in the parent Radiance.

2118 Sunburst. Brilliant, orange-copper; long stemmed, vigorous.

Everblooming Hybrid Tea Rose Collection

One each of the 11 Hybrid Tea Roses for only \$3.25, postpaid.

Hybrid Rugosa Roses

Your selection, 50c each; 3 for \$1.00.

2150 Belle Poltevine. The blooms are large and full, the petals gracefully in-curved. Bright, clear, lively pink.

2151 Hansa. Double reddish-violet flowers of large size. Hardy and dependable.

2152 Sir Thomas Lipton. White, double flowers. A continual bloomer.

2153 F. J. Grootendorst. Beautiful small red flowers. Blooms all summer.

Hardy Climbing and Rambler Roses

Your selection, 50c ea.; 3 for \$1.00

2130 Dorothy Perkins. Pink clusters of pink blossoms with crumpled petals, heavy growth of glossy foliage.

2131 Excelsa. Red, double glossy foliage which never mildews or spots. Extremely vigorous.

2133 Crimson Rambler. One of the oldest and best.

2132 Gardenia. Best yellow, but not as perfect as the pink or red ones. Flowers are double.

2134 Paul's Scarlet Climber. Rapid grower with wonderful double scarlet blooms.

2136 Climbing American Beauty. Deep rose-pink.

Rambler Collection

Get your neighbors to order with you and get one of each of the Rambler roses at a substantial reduction. One each, or six in all, for \$1.75, postpaid.

Baby Ramblers

Your choice, 50c each; 3 for \$1.00.

2142 Baby Dorothy. A prolific producer of pure pink flowers.

2143 Catherine Zelmé. Pure, snow-white, double in profuse clusters. Foliage dark, glossy.

2144 Orleans. Brilliant Geranium-red suffused rose and deep cerise.

Baby Rambler Collection

Three Baby Ramblers, your choice of colors, for 95c, postpaid.

Vines Add Charm and Beauty

2801 Virginia Creeper or American Ivy. This is a favorite with many. Its deeply cut green leaves turn to crimson in the fall. Perfectly hardy everywhere. Grows in practically every soil. Must be tied up. Will not cling to walls. Price, 25c each; 3 for 70c.

2802 Bittersweet. Very hardy, grows in sun or shade. Yellow flowers in June, followed by bright orange and scarlet berries in fall and winter. The native climber is easy to grow. Price, 35c each; 3 for \$1.00.

2803 Boston Ivy. Small-leaved variety. One of the finest hardy climbers. Clings firmly to smooth surfaces. Leaves overlapping. Makes a wall of green that changes in fall to bright crimson and yellow. Does not have to be tied. Price, 50c each; 3 for \$1.40.

2804 Dutchman's Pipe. A truly remarkable vine. Large, heart-shaped leaves. Makes a very dense screen of foliage. Thrifty grower and hardy. Brownish flowers are pipe-shaped. Leaves have a shingle-like arrangement. Does best on north side of house. Price, 60c each; 3 for \$1.50.

2805 Engelmann's Ivy. Clings to walls and trees by means of tendrils like the Boston Ivy. Foliage resembles Virginia Creeper, but is smaller and denser. Considered the hardiest of all. Price, 30c each; 3 for 80c.

2806 Trumpet Vine. A hardy native vine. Robust grower. Trumpet-shaped flowers colored an orange-scarlet. Light green leaves. Price, 30c each; 3 for 80c.

2807 Wisteria (Purple). A very handsome climber. Attractive foliage. Flowers are borne in magnificent purple clusters. Exceptionally desirable for porches, pergolas and trellises. Price, 60c; 3 for \$1.50.

2808 Honeysuckle (Scarlet Trumpet). Rapid grower. Excellent vining qualities. Fragrant flowers. Will thrive in shady places. Price, 30c each; 3 for 80c.

ORNAMENTAL SHRUBS

Extra Nice Grade and Quality

A little money invested in ornamental shrubbery pays big returns. It adds to the value of your home many times what it costs. A home without shrubbery is like a picture without a frame. Many a plain looking house could be made into a place of beauty by proper planting. You will enjoy your home more and you will take greater pride in it when it is fixed up so as to catch the eye of the passer-by.

A few dollars will buy a lot of high-class shrubbery at the low prices here quoted. Take advantage of these offers. Quality considered, these prices are extremely low. Set out the stock this spring. It needs very little care after it is once started. The busiest of people can find time for shrubbery.

Feel free to write us for suggestions. If your requirements are large send us a list of your needs and we will gladly quote you. Place your orders early and be assured of getting just what you want. Shipment will be made as soon as weather conditions permit in the spring.

3100 Almond, Pink Flowering. Pretty dwarf bushes that produce small pink flowers. 18-24 inches. 50c each.

3101 Almond, White Flowering. Same as above except flowers are white. 18-24 inches. 50c.

3103 Althea (Rose of Sharon). Practically everblooming. Large showy flowers in red, white or purple. 18-24 inches. 30c each.

3102 Barberry Thunbergi (Japanese). Has glossy, green foliage changing to coppery red in the fall. Attractive yellow blossoms and little red berries which hang on all winter. 30c each; 3 for 75c; 10 or more 20c each.

3104 New Red Leaved Japanese Barberry. Similar in all respects to the green-leaved variety except the foliage is a rich lustrous bronze red. The foliage retains its coloring throughout the entire summer, becoming more and more brilliant as time goes on until it changes to a vivid orange in the fall. 12-18 inches. \$1.00 each.

3105 Calycanthus. Flowers very double, of a purplish brown color and very fragrant. Sometimes called "Sweet-scented Shrub." Blooms most all summer. 18-24 inch. 60c.

3106 Cydonia Japonica (Japan Quince). Called Firebush because when it is in full bloom it is just like a blaze of fire. Very hardy has little thorns on it and grows about six feet tall. 50c each. 2-3 ft. size.

Deutzia

3110 Lemoine. Dwarf. Large, pure white flower. Cone-shaped heads. Postpaid 60c each; 3 for \$1.50.

3112 Rosea. Single Pink. Blooms in June. Very generally grown. 30c each; 4 for \$1.00.

3113 Pride of Rochester. Is tall. Growing higher than ones head. Pure white flower. Postpaid, 30c each; 4 for \$1.00.

Dogwood

3121 Cornus Sibirica. This has a real bright red bark. Foliage is dark green, flowers creamy white. Postpaid, 30c each; 4 for \$1.00.

3123 Yellow Barked. Same as cornus except for the bark which is yellow. Better plant some of both. Postpaid, 50c each; 3 for \$1.25.

3124 Variegated. Purplish red branches. Silver variegated foliage. Excellent for mass planting in ornamental landscape jobs. Postpaid, 50c each; 3 for \$1.25.

Elder

3130 Golden. Has a green background. It is one of the very finest of golden leaved shrubs. 35c each; 4 for \$1.00.

3131 Cut-leaved. Leaves are deeply cut which gives it a beautiful fernlike appearance. Grows 6 to 8 feet tall. Postpaid, 30c each; 4 for \$1.00.

(Forsythia (Golden Bell))

3133 Earliest shrub to bloom. Covered with golden yellow bell-shaped flowers before the leaves. Postpaid, 30c each; 4 for \$1.00.

High Bush Cranberry

3135 Similar to the Snowball, but bloom is more open and spreading and is followed by cluster of scarlet fruit like cranberries. Postpaid, 40c each; 12 for \$4.25.

BEAUTIFY YOUR HOME AT A LOWER COST NOW

SPECIAL LOW SALE PRICES

Hydrangea

3140 Paniculata Grandiflora. Blooms in August. Flowers immense cone shaped trusses. Best results are obtained in partial shade.

3141 Arborescens Grandiflora. Flowers like Snowballs, pure white, except larger. Postpaid, 50c each; 3 for \$1.25.

3142 Tree Hydrangea. This is the Paniculata Grandiflora with all its beauty of great clusters of blooms in tree shape. Will grow 10 to 12 feet high; 2 to 3 ft. \$1.00 each; 3 to 4 ft. \$1.25.

3150 Bush Honeysuckle. They have fine foliage. They flower profusely and then they are laden with red twin berries. Grows 5-8 feet high. 30c each; 4 for \$1.00.

3160 Lilac Common or Old Purple. This is the old-fashioned, well known variety that will always keep its popularity. 35c each; 4 for \$1.00.

3161 Lilac Common White. The most popular white variety. 40c each; 3 for \$1.00.

3162 Lilac Persian Purple. Blooms more freely than the common lilac and has smaller leaves. 50c each; 3 for \$1.25.

3171 Syringa (Mock Orange). A hardy free-flowering shrub with showy fragrant flowers. Grows 8 to 10 feet. 30c each; 4 for \$1.00.

3182 Snowball. Grows 8 to 10 ft. Great clusters of snowy white globes of flowers in May. 50c each; 3 for \$1.25.

3190 Snowberry. A fine ornamental shrub very hardy. Clusters of waxy white berries. 35c each; 4 for \$1.00.

3191 Snowberry. Red. Has small, red berries. Very attractive. 25c each; 5 for \$1.10.

Spirea

3200. Anthony Waterer. Very compact and low growing. Flowers dark crimson pink. Postpaid, 40c each; 3 for \$1.00.

3205 Billiard. Grows 4 to 5 feet high. Blooms July and August. Rich pink flowers. Postpaid. 18 to 24 in. 30c.

3201 Callosa Alba. Same as Anthony Waterer except the blooms are white. Price: See Anthony Waterer.

3202 Froebell. Another beautiful red variety. A strong grower. Fine for borders and planting along foundations. 40c.

3203 Thunbergi. Most beautiful of all. Foliage quite fine. Almost yellow. Grows 3 to 4 feet high. Postpaid, 40c each; 3 for \$1.00.

3204 Van Houtti. So-called Bridal Wreath. Fountain of white by Decoration day. Grows 3 to 6 feet high. Postpaid, 30c each; 4 for \$1.00; 10 for \$2.25.

Tamarix

3210 Extremely hardy. Feathery plume-like foliage. Will stand drought or cold weather. Flowers pink. Postpaid, 35c each; 4 for \$1.00.

Weigela

3220 Candida. Pure white flowers. Postpaid, 40c each; 3 for \$1.00.

3221 Eva Rathke. Most free blooming of the Weigelas. Blooms are a dark red. Dwarf in habit. Postpaid, 50c each; 3 for \$1.25.

3222 Rosea. Hardiest of all the Weigela. Blooms freely. Flowers are rose colored. Postpaid, 40c each; 3 for \$1.00.

Privet

Handsome bushes when left untrimmed for foundation plantings and specimen plants. We can furnish three varieties: Amoor River, California, and Regels. Postpaid, 10 for \$2.00; 25 for \$4.00; 100 for \$15.00.

For the want of space we could not name size or prices. Write us what you need and we can make you specially low prices on extra select trees.

High Grade Pruning Shear. Made by one of the foremost tool makers in America. 9-inch size. 95c postpaid.

NATURE'S FINEST TREATS

Now Obtainable at LOW COST

SMALL FRUITS TO COMPLETE YOUR GARDEN

MASTODON STRAWBERRY

Wonderful, Newly Developed Strain. Get the Genuine, Nationally Advertised Mastodon. Here it is.
MASTODON—The wonderful new Everbearing Strawberry. Enough cannot be said for it. Under ordinary field culture it has produced at the rate of 350 16-quart crates per acre the same year it was planted. Its great size and luscious flavor are greatly in its favor on the market. It will bring far better prices than the older everbearers because of its beauty and enormous size. It is unsurpassable; you should start your Mastodon bed at once—it will reap fine profits for you.

Postpaid—25 plants for \$1.00; 50 plants for \$1.50; 100 for \$2.75.
 Not postpaid—200 for \$5.00; 500 for \$10.00; 1,000 for \$18.00.

IMPROVED PROGRESSIVE—It is a heavy fruiting type. The berries are firm. It is a good shipper and we recommend it for every garden, as well as for commercial growers. Self fertilizing. It is a berry that is hard to equal.

CHAMPION—Big berries, rich in flavor and produced in great abundance. Long roots, good drought resister and a heavy yielder. In some respects superior to the Progressive. Tested and proven a remarkable kind. The two above varieties are priced as follows:

Postpaid—25 plants for 70c; 50 for \$1.15; 100 for \$1.85; 200 for \$3.35.
 Not postpaid—500 for \$8.00; 1,000 for \$15.00.

RED GOLD

Red Gold is a revelation in spring varieties. It is enormous in size. Some of these measure eight inches around. Color is shining red. They do not contain the acid found in common varieties. Require less sugar and are called the preserving berries. Fruiting season thirty days.

Postpaid—12 for \$2.00; 25 for \$3.50; 50 for \$6.00; 100 for \$10.00.

SENATOR DUNLAP

A favorite wherever tried. There are a few kinds a trifle earlier, but they do not produce such fine fruit. It is early. The fruit is large. Color is a deep, rich red. The flesh is red and it has the most delicious, sprightly flavor. Plant will withstand a lot of hardships. It is highly productive. The berry is a good keeper and an excellent variety for commercial gardeners. It is also good for canning. Self-pollinizing.

GIBSON

Medium late. Berries large, beautiful dark red in color, vigorous grower and very productive. Bears through a long season. Grows well almost anywhere and is very popular for canning. Not a shipping berry, but its high quality makes it very good for home garden or local market.

DR. BURRILL (The Million Dollar Strawberry)

You, no doubt, have heard of this famous variety. It is without question a wonderful berry. Vigorous growing, drought resisting, and long rooted. A little later than the Dunlap. Large, delicious, dark red berries. A "perfect" variety. We strongly endorse this variety.

Postpaid—Above 3 varieties, 50 for 60c; 100 for \$1.00; 300 for \$2.75. Not postpaid—200 for \$1.50; 500 for \$3.25; 1,000 for \$6.00.

Ask for prices on larger quantities.

BLACKBERRIES

3700 Eldorado. Hardy, berries are large, jet black, in large clusters.

3701 Early Harvest. The earliest variety. Fruit rather small and sweet. Not recommended for the North, but does well in Missouri, Kansas, Southern Iowa, etc. It is an old standby.

3702 Snyder. The old standby. Very hardy, thrifty and vigorous growing. Berries are borne in large quantities.

Prices postpaid—10c each; 10 for 75c; 50 or more, 6c each.

RASPBERRIES RED

3725 Latham Red. An extra hardy red Raspberry from Minnesota. Extra good.

GRAPES

3775 Concord. Variety grown for market the country over. Needs no description.

1 yr., 12c each; 10 for 95c; 2 yr., 18c each; 10 for \$1.35.

3776 Moore's Early. Very fine for market purposes. Ripens 10 days before the Concord.

1 yr., 15c each; 10 for \$1.20; 2 yr., 20c each; 10 for \$1.50.

3778 Agawam. One of the best of all red varieties. Quite large, very rich in flavor.

1 yr., 15c each; 10 for \$1.20; 2 yr., 20c each; 10 for \$1.50.

3779 Niagara. Greenish white, heavy yielder. Bunches large and compact. Most satisfactory of all white grapes.

1 yr., 15c each; 10 for \$1.20; 2 yr., 20c each; 10 for \$1.50.

Special Grape Collections. 2 Moore's, 2 Niagara, 2 Agawam, and 4 Concord. \$1.45, postpaid. 2 year size. Same collection in one year size, 85c; postpaid.

3726 St. Regis or Everbearing Red. Brilliant crimson, good size, ripens early; produces until frost.

3727 Cuthbert. Red. One of the old standbys. Sweet and very rich.

RASPBERRIES BLACK

3750 Cumberland is the best known of all the black-caps; a strong grower, heavy bearer and of excellent quality.

3751 Kansas. Earlier than the Cumberland. Large jet black berries. Heavy cropper. A great table berry. Moderately juicy, good flavor.

3752 Plum Farmer. Moderately large berries, jet black and quality excellent. Fine for eating, canning, and marketing. Vigorous grower, good yielder.

Prices postpaid. Strong transplant, 15c each; 10 for \$1.25; 50 or more, 10c each.

CURRENTS

3785 Cherry is a very deep red, large, rather acid, but fine for jelly.

3786 Fay's Prolific is not so red, bunches very large; is very productive.

3787 Improved Perfection is a cross between Fay's Prolific and White Grape. A beautiful bright red.

3788 White Grape, the best of white varieties.

GOOSEBERRIES

3770 Downing is a more compact grower, berries green and very large; for dessert and canning.

3771 Houghton is the strongest grower, a good annual bearer, fruit of fair size.

Gooseberries and Currants postpaid, 25c each; 10 for \$2.00; 25 or more, 18c each.

Note.—Many states have different laws concerning shipments of Currants and Gooseberries. If your state should have special regulations we will ship your stock from nursery connections in your section.

BERRY'S INSECTICIDES

Black Leaf 40. A nicotine sulphate solution for soft bodied sucking insects. Not available. 1/2 lb., \$1.20; 2 lbs., \$3.40.

Slug Shot. Non-poisonous. Destroys potato bugs, currant worms, cabbage lice and worms. Dusted on. Available. Postpaid 1 lb., 25c; 5 lbs., \$1.00. Not prepaid, 5 lbs., 75c; 10 lbs., \$1.25; 50 lbs., or more, 11c per lb.

DOLLARS SAVED On Fruit and Shade Trees

Our Fruit Trees are extra selected stock. Grown only 25 minutes' drive from our Seed House. Hundreds of acres of all kinds of nursery stock to select from and under Supervision of Horticulturist from the State Department that makes the stock you buy free from disease; and another feature: your nursery stock does not make two or three trips before you get it.

GUARANTEE

We guarantee that our stock will reach the purchasers alive and in a growing condition.

SIZES

We offer all our fruit trees in two sizes. The mail size are 1 year trees on 2 year old roots, 3 to 4 feet. The Express are 2 year old trees on 3 year old roots and are 4 to 5 feet high.

SUMMER APPLES

- 3500 Red June.** Early bearer, hardy. Red Medium size. High flavor.
3501 Yellow Transparent. Flesh white, juicy and fine grained. Very fragrant when fully ripe. Fine for eating or table. Ripens in August.
3502 Duchess. Early, very hardy, red striped, juicy, the very best quality for cooking or market.
3503 Maiden Blush. A large apple with a beautiful blush on side. A pleasant sub-acid flavor and a valuable apple.

WINTER APPLES

- 3510 Delicious.** This apple commands the highest price in the market. Fine grained, crisp and juicy sweet slightly touched with acid. Equal to the best. The best eating apple in the list.
3511 Grimes Golden. Early annual bearer. Yellow, crisp, spicy, sub-acid.
3512 Jonathan. A red apple; fine for winter. Tender and juicy.
3513 Stayman Winesap. Dark rich red; flesh firm and crisp. Exceedingly juicy and tender. Bears young.

CRAB APPLES

- 3520 Red Siberian.** Small, used for jelly and pickles. Showy red; vigorous and hardy. August to September.
3521 Whitney crab. A rapid grower, hardy. Medium size. Yellow, striped with red, very juicy and fine grained. Flavor rich, almost sweet.

PEACHES

- 3574 Champion.** This is a very hardy variety. Creamy white skin, red cheeks; freestone. Ripens about two weeks before the Elberta.
3576 Elberta. The great market peach of the Southwest. Very large, yellow with red cheek.
3575 Crawford's early. (Freestone) Best early market. Fruit very large. Color yellow, juicy and fine flavored.
3577 J. H. Hale. Like Elberta, but earlier.

PRICES ON APPLES AND PEACHES

MAIL SIZE—Postpaid. 35c each; 4 trees for \$1.00; 10 trees \$2.25; 25 or more 20c.
EXPRESS SIZE—Not Prepaid. 50c each; 4 trees for \$1.75; 10 trees \$4.25; 25 or more 40c.

CHERRIES

- 3550 Early Richmond.** Very productive. Medium sized, bright red and very juicy. Very hardy, will stand severe weather. Ripens in June.
3551 Large Montmorency. Large; about 10 days later than early Richmond.
3552 English Morello. A large variety. Tree dwarf and slow grower. Very hardy and productive. Fruit large, very dark red, almost black; an enormous yielder. July and August.

PEAR

- 3600 Bartlett.** Very popular, large; melting, rich flavor.
3601 Kieffer. Yellow with red cheek where exposed to sun. Flesh white, juicy and rich. Late keeper, very hardy.

PLUM

- 3625 Waneta.** One of the new Hansen Hybrids, and the best one of the list. Two inches in diameter; reddish purple; wonderful quality, early bearer and hardy anywhere.
3626 Terry. Very large, high quality, hardy anywhere and sure to bear

3627 Sapa. A rich purple Plum. One of the best Hansen hybrid cherry varieties. Bears early, yields well. Season extremely early.

3628 Underwood. A new variety. Large roundish oval shape fruit; color red. Juicy flesh. Ripens early and continues over a long period. Fruit hangs well to tree. Small clingstone.

PRICES ON PLUMS, PEARS AND CHERRIES
MAIL SIZE—Postpaid. 40c each; 3 for \$1.00; 10 or more 30c each.

FREE ANNIVERSARY GIFTS FREE

Gift Offer Expires March 15

The prices in this catalog are the lowest and the greatest values ever offered. We have made these sensationally low prices to secure new customers. Once started you will become a permanent customer. This is the reason for these unparalleled low prices and these Anniversary Gifts. Positively no changes on gifts offered.

The latest thing in Colored Chinaware.

FREE With \$100. ORDER OR MORE 10 PIECE WAFFLES SET

All sets of Chinaware offered in the newest antique ivory finish, which is a yellow tint, decorated in beautiful floral design in color. Shape of dishes is shown in illustration which is one of the newest and best patterns in great popular favor.

This waffle set consists of one 10-in. waffle dish, six 9-in. waffle plates, 1 syrup pitcher, 1 butter dish. This set very popular for serving waffles or pancakes. If you do not wish dishes you can have 8 bushels of inoculation for any legume instead.

How Gifts Are Awarded

Every order at regular catalog prices for \$1.00 or more is entitled to a free Gift. We do not give these Anniversary Gifts on special reduced quotations or on special priced collections. You select the gift you want according to the size of your order. For example an \$80.00 order would be entitled to the Cake Set or 4 bu. of Inoculation. Only one Gift to an order and only one to a family.

How to Get the Best Gifts

If you want the 42-pc. dinner set, but your order is not large enough, call on your neighbors and make up a \$250.00 club order. Send the order in your name and the dinner set is yours. You may be an old customer, and by getting new business, you can secure one of these Anniversary Gifts.

Description Dishes

Finest, newest flower design, latest patterns. New antique shape, beautiful antique ivory, very dainty and pleasing. Absolutely serviceable. Something every woman will be delighted with.

You will be delighted with these gifts.

FREE With \$150. ORDER OR MORE 18 PIECE BREAKFAST SET

This set of same quality design and color as waffle set.

Anyone can be proud of such a set on their table. Complete breakfast set for four people. Consists of 4 cups, 4 saucers, 4 plates, 9-inch; 4 cups, 4 meat platter, 11-inch; 4 fruits, 11-inch; 1 open butter dish. These sets are so new in color, design and shape that you can, as a rule, find them at that time only in the larger cities. Color in dishes is all the "rage."

Or you can have 12 bushels of inoculation, if you do not want dishes.

FREE With \$200. ORDER OR MORE 32 Piece DINNER SET

You get the same latest antique ivory finish with beautiful floral design in this dinner set. Right up to the minute for style, shape and color. This wonderful 32-piece dinner set goes on orders for \$200.00 or more sent in before March 15, 1929. Set consists of 6 large dinner plates, 6 dessert plates, 6 fruit dishes, 6 cups, 6 saucers, 1 meat platter, 1 big platter. An ideal dinner service for six people.

Or you can have 16 bushels of guaranteed inoculation free on an order for \$200.00 or more. All clovers should be inoculated.

FREE With \$250. ORDER OR MORE 42 Piece DINNER SET

A complete service for eight people of this wonderful new Chinaware. This 42-piece set consists of 8 cups, 8 saucers, 8 dinner plates, 8 pie plates, 8 fruit dishes, 1 meat platter, 11-inch; 1 round vegetable dish, 8-inch. If you could find this beautiful set by this famous China maker in your town you would probably find it priced too high to buy. We bought thousands of these sets direct from pottery makers and thus can make this famous gift offer.

Or you can have 20 bushels of inoculation in place of the dinner set, if you prefer.

FREE With \$1. ORDER OR MORE

Four packets of Garden or Flower Seed (your selection) will be given with every order of \$1.00 or more. These are our regular order, size packets filled with new, high germinating, guaranteed seeds. State whether Garden or Flower Seed is wanted. We will send you a good selection.

FREE With \$2.50 ORDER OR MORE

When you buy \$2.50 or more you can have your choice of the following: 2 fine Iris bulbs, or 1 dozen of beautiful Gladioli bulbs (your selection), or 6 choice roots of the popular Madonia vines.

FREE With \$5. ORDER OR MORE

Under this sized order you have your choice of 1 fine Rose bush or 2 Spiraea shrubs or 1 dozen of Gladioli bulbs (your selection as to variety). You can enjoy the beauty of these gifts for years to come.

FREE With \$10. ORDER OR MORE

In this group you have your choice of 2 choice rose bushes (your selection), or an extra large, accurate, one-of-a-kind, from 40 degrees ranging from 40 degrees to 120 degrees above, guaranteed accurate within 1/2 inch of Inoculation. Any of these are a most acceptable gift to anyone.

FREE With \$25. ORDER OR MORE

Here are some choice gifts to those who buy \$25.00 worth or more. Four fine, healthy apple trees. Good, sturdy stock (your selection), or 4 bushels of inoculation. Every farmer should inoculate his Clovers, Peas and Beans. Gives better assurance of a strong, healthy stand and means a larger crop. See page 6. Perhaps you prefer to buy the inoculation and take the trees as a gift and start building up a new orchard. Make your choice and help us celebrate our Thirty-fourth anniversary.

FREE With \$50. ORDER OR MORE

The same fine unique Chinaware as those described above. All these sets match. This is a pie or cake set. Consists of a big 10-inch cake or pie plate and 6 serving plates. Your friends will surely compliment you on such a set. No changes made in any set or any gift offer.

Those wishing inoculation instead can have 4 bushels of it with an order for \$50.00 or more.

BABY CHICKS SPECIAL SALE

STRONG, PEPPY, HEALTHY FELLOWS

Delivered 100% Alive Anywhere in the United States

We all want profitable poultry. The kind of stock we secure for our flocks has a great deal to do with our success. It pays you, therefore, to look carefully into your purchases of baby chicks. You can buy chicks in many places. There are all kinds of prices and likewise all kinds of chicks. It isn't so much of what you pay for them, but what you get. You can't make a success by starting with poor stock.

What Makes Quality

There are several factors to consider. The parent flocks are of vital importance. Every bird in the flocks producing our chicks are passed by accredited experts. Each flock is thoroughly culled and we, therefore, term these chicks "Certo-Culd."

Proper incubation is equally important. Many chicks from good stock are weakened and made susceptible to disease by improper incubation. Amateurs, beginners and those with poor incubators are flooding the markets with chicks of this character. Our hatchery is operated by men who have had a quarter of a century of experience in all branches of the poultry industry. The incubators are of the mammoth sectional type. They are under constant supervision and check. We ship you the finest type of stock.

High Quality at Low Price

You are securing in these chicks a quality superior to the average. Consider that when you compare prices. We are handling these chicks during this special "Third of a Century Sale" on an extremely close margin. We are willing during this sale event to practically forget about profits in order to get many more farmers acquainted with the superior quality we put out. We want 20,000 new baby chick customers and have made our prices accordingly low. You will find some lower prices quoted no doubt, but quality considered we challenge the world on baby chick values. Let us serve and satisfy you with these fine baby chicks.

PRICES AND SHIPMENT

Prices given are all delivered prices. We include extra chicks in each shipment, to cover small losses. Usually 4 extra in every 100. Order early to assure getting shipping date you want. Specify date in order. If immediate shipment is desired give a second choice if possible. Terms are cash with order. Our guarantee gives you full protection.

BERRY'S PERFECTION INCUBATOR

A REAL HATCHER AT A LOW PRICE

Sturdily built of California Red Wood. Double walls with dead air space. Extra insulation on top. Patented self turning egg trays, very strongly built. Deep nursery with special trays. Hot water heat. Copper boiler. Automatic temperature control. Special lamp that is safe. Bears Underwriters label. It comes complete. Nothing extra to buy. Built for years of satisfactory service.

IT DOES THE WORK

When you buy an incubator you want one that will turn out the largest possible percentage of a hatch and you want the chicks to be peppy and strong. Your success with hatching chicks is going to depend largely upon your incubator.

We have sold these machines for years. In all that time we had only one machine that was claimed unsatisfactory and that was due to injury in shipment. They are the product of over

30 years' experience in incubator building. In short, they give complete satisfaction. It is simple to operate. You will get your money's worth and then some when you buy one of these machines. You can pay more money but you can't get more value. If after you get your machine you think you are not perfectly satisfied or that you can get a better value elsewhere, we will order our machine returned and refund money plus freight.

PLOWS AND DRILLS

Much of the garden labor can be saved by a good plow. Puts gardens in better shape. Produces larger crops. We have an excellent high wheel plow cut No. 240, a genuine Hudson for only \$35.00.

An extra high grade plow is the famous Stanley. Easily adjustable. Plow shares of real plow steel. It scours. Will last a life time with ordinary care. Very easy running. Cuts 10 inches wide. Best plow you can buy. Price \$6.50. Your money back if not satisfied.

Combination No. 201. Famous Hudson Hill & Drill seeder and single and double wheel plow. Handles any kind of seed. Easily adjustable. Full description in our big Free catalog. Price, \$15.00.

Hill & Drill Seeder, No. 205. Same as 201 only does not have the plow and cultivator attachment. \$12.50 F. O. B. Clarinda.

SPRAYERS

Each year we learn the importance of spraying for better yields. Good Sprayers simplify the work. Saves material and do a better job.

Hudson Perfection is a high-grade compression Sprayer. Holds four gallons. Full description in catalog. Handles all sprays. Automatic non-clogging nozzle. Galvanized tank, \$5.95. Brass tank, \$7.95. Shipping weight, 11 pounds.

Hudson Junior. About the same as Perfection, only smaller. Capacity, 2 1/2 gallons. Galvanized tank, \$4.95. Brass tank, \$6.95. Shipping weight, 8 1/2 pounds.

Dust Sprayers. Hudson Major, 28 inches, 98c. Hudson Cadet, 15 1/2 inches, 49c. Excellent dusters.

CYCLONE SEEDERS

One of the greatest labor-saving devices that can be had for small cost. Simply and durably constructed. Requires no expert to handle it. A boy can do the work. Easily regulated for sowing various quantities of different kinds of grass and clover and grain. Sows it evenly. Cuts down labor costs. From 30 to 60 acres per day can be sown with this machine.

This seeder is guaranteed to do satisfactory work. We have sold thousands of them. We can get smaller and cheaper seeders to sell for less money, but they are not in a class with the Cyclone. It's a big value at a small price. Only \$2.00 f. o. b. Clarinda. \$2.25 postpaid.

Horn Seeders. Very simple. Seed feeds into long tin horn, which is swung from side to side. \$1.00 postpaid.

The last half of the book goes into detail on garden and flower seeds, and bulbs and plants. It likewise deals with nursery stock such as fruit and shade trees, small fruits and ornamental shrubbery. Then you will find information on Baby Chicks, Incubators, Brooders, Garden Implements, Sprayers, Insecticides, Disinfectants, etc. It will pay you well to read and study it. It is free. The enclosed postal will bring your copy.

We are proud of the quality of our seeds and the values we are giving the American Farmer in this great 34th Anniversary Sale. If you want to see samples of any seeds ask for them. There is space on the post card for listing the crops you are especially interested in. Mail that card today. Many of the special bargain lots offered in this catalog are limited and cannot be duplicated after they are sold. We suggest therefore that you place your order for such lots as appeal to you at once. You take no chance whatsoever for if the seed and value fails to please you, the seed may be returned, and money plus freight will be promptly refunded. We know these bargains are unparalleled and gladly ship on that basis.

While the big catalog is much more detailed in its descriptions we want to make it clear that the extra values and bargains are all set forth in this special book you have in your hands. These offers are all made for early orders. You buy at the very lowest prices when you order from this book.

Furthermore the special anniversary gifts for new customers listed on page 39 are for orders from this special catalog.

All you have to do to get our free catalog and samples is to fill in the enclosed post card. Be sure to write your name and address plainly. We suggest that you print it so as to make each letter clear.

Under new postal regulations you do not have to even put a stamp on the card. We pay the postage at this end. So fill it in today and drop it in the mail box.

Scranton, Iowa, Nov. 13, 1928.

Dear Sir: I have been buying all my Grass and Garden seeds from The Berry Seed Company for the past 12 years. I have purchased each year for myself and friends from \$300.00 to \$1,000.00 worth of seed each year, and can honestly say that I intend to continue to do so, as I have always received the highest quality of seed and at a price cheaper than I could obtain it elsewhere. I have never had cause for complaint, nor have I ever had any complaint from any of my friends for whom I have purchased seeds.

Very truly yours,
Farmers State Bank of Scranton.
Newman Shaw, President.

Eldora, Iowa, Nov. 27, 1928.
Gentlemen: In the last five years I have purchased over \$2,000.00 worth of grass seed for our own use from The Berry Seed Company. I find them a reliable firm and the seed satisfactory. Prices are reasonable—quality considered. I buy the World Brand. Have always secured a good stand from their seed.

Yours truly,

G. C. Follett

Let Us Explain How Thousands of Farmers In 48 States Save Money By Buying Direct From Our Big Factory

Every AMERICAN FARMER realizes he has to pay too much for what he buys in proportion to what he receives for his farm products—It has simply been a question of distribution—Too many in-between-profits. Several years ago THE U. S. FARM SALES COMPANY conceived the idea of SELLING DIRECT at FACTORY PRICES from its BIG harness factory and thus eliminating all unnecessary profits—Putting every farmer's cash buying dollar on an equal basis with the Jobbers, Wholesalers, etc. This DIRECT method of selling has been WELCOMED by thousands of farmers throughout the entire United States—So we proudly say: NO CONCERN CAN CLAIM A MORE LOYAL OR SATISFIED GROUP OF CUSTOMERS.

36 YEARS Harness Making

Nationally Known for Quality

We never cut the QUALITY to meet a lower price of competition. The fact is we have NO COMPETITION when QUALITY is taken into consideration—yet our prices are in keeping with what you receive for your farm products. We INVITE YOU to make your own comparison—YOU to be the sole judge—Ask us to send you a set of harness FREE for your inspection—compare it with any harness you wish and if you don't think we made you a harness of better quality and workmanship, heavier straps and SUPERIOR to any other harness selling near its price—you are not out one penny. If you decide to buy the harness you can use it 30 days—if you don't like it, ship it back and all your money including transportation charges will be paid back to you. Remember: Every set is Guaranteed for the life of the harness.

We Make the Style of Harness You Want

Prices: \$23⁵⁰ \$42⁶⁰ \$47⁵⁰ \$53⁵⁰ \$58⁵⁰ \$59⁷⁵ Up to \$78⁵⁰

We make a style of harness to fit the need of every buyer—Those who want the finest that money can buy—Also those who feel that they have only a limited amount of money to put into a set of harness. We give you 8 styles of horse and mule collars to select from—prices on All-Leather collars ranging from \$3.15 up. Saddles \$15.95 up to \$48.75 for our finest stock saddle. We also show a complete line of extra harness parts in our catalog.

Our Customers Save On

Work Shoes, Overalls, Shirts, Rubber Boots, Arctics, Slickers, Work Gloves, Blankets, etc. A complete line of Paints, including varnishes, etc. We have Thousands of our regular harness customers using our FARCO tires and tubes—Guaranteed for 18,000 miles. WRITE today for Catalog—It's FREE for the asking.

New Way to Milk Cows

**Milks Cows Like
No Other Machine
Ever Milked Cows
Before**

“TUGS”—like the calf!

The Surge Milker

Here's something new in machine milking. The wonderful new Surge Milker! It **tugs like the calf**—and like the calf, tugs harder and harder as the cow milks out—gets the milk as no machine got it before. The Surge is making records for breeders who never dared use a machine before. And because it is the **only** machine with NO long tubes—NO claws the Surge produces low count, premium priced milk—with less work and less expense than any other milking machine. You owe it to yourself to SEE how much faster, cleaner and better the Surge will milk ALL your cows—even that cow you think can't be milked by machine. Ask for a FREE Surge Demonstration today.

Free Demonstration

Write today for details of our Free Demonstration Offer which lets you prove everything—right in your own barn, with your own cows—at our risk and no obligation to buy. See—**KNOW** why the Surge is **easier** to clean, **easier** to operate, produces cleaner, lower bacteria count milk and milks cows faster, cleaner and better than any machine you have ever used or seen. Get our **EASY TERMS** that make it so EASY for you to own the Surge. Send for the free Surge catalog—mail coupon now!

Send for Free Catalog

ABOVE ALL ELSE—QUALITY

You simply can't get better quality than Kalamazoo quality. Why? The reasons are: First, Kalamazoo specializes—Kalamazoo stoves and furnaces are built complete in one big 13-acre factory. Second, Kalamazoo has tremendous buying power—that means purchasing the best raw materials at lowest prices. Third, big scale production enables us to manufacture efficiently at extremely low cost. By selling direct, eliminating all "in-between" profits, you get absolute rock-bottom factory prices. Last year Kalamazoo customers saved \$1,000,000.

Anniversary BARGAIN Collections

APPLE COLLECTION

8 Trees, \$1.75 postpaid; 2 collections for \$3.35.
1-yr. Stock on 2-yr. Roots.
This is a dandy. 1 Red June, 1 Yellow Trans-
parent, 2 Delicious, 2 Grimes Golden, 2 Jona-
thans. All high grade
stock offered in collec-
tion at a real bar-
gain price. Com-
pare and see.
These are all popu-
lar and very desir-
able varieties.
Plan for the
future. Set out
some apple
trees this
year. There
is both
pleasure and
profit in a
home or-
chard. These
prices are very
low and will
save you money.
(No Gifts on col-
lection orders.)

GRAPE COLLECTION

10 Vines, \$1.45 Postpaid. 2-year
size. Same collection in one-
year size, 95c Postpaid.

This Collection is com-
posed of big, healthy
vines. 2 Moores, 2 Ni-
agara, 2 Agawam, 2
and 4 Concord. A few
good grape vines soon
bear an abundance of
delicious fruit. You can
set them along the side or
end of the garden. Thus
they do not occupy much
space. Grapes can be used
in so many different ways
that no family should be
without a plentiful sup-
ply. It is surely fine to
have some different varie-
ties in your garden matur-
ing at different times.
This gives you different
flavors as well. Save money on this fine collec-
tion. (No Gifts on collection orders.)

MASTODON STRAW- BERRIES

A wonderful new Everbearing
Strawberry. Enough cannot be
said for it. Under ordinary cul-
ture it has produced at the rate of
350 16-quart crates per acre the
same year it was planted. Its
great size and luscious flavor are
greatly in its favor on the market.
It will bring far better prices than
the older everbearers because of its
beauty and enormous size. It is
unapproachable; you should start
your Mastodon bed at once—it
will reap fine profits for you.

Postpaid—25 plants for \$1.00;
50 plants for \$1.50; 100 for
\$2.75. Not postpaid—200 for
\$5.00; 500 for \$10.00; 1,000
for \$18.00.

RED GOLD STRAWBERRIES

Red Gold is a revelation in
spring varieties. It is enormous
in size. Some of these measure
eight inches around. Color is
shining red. They do not con-
tain the acid found in common
varieties. Requires less sugar and
are called the preserving berries.
Fruiting season thirty days. The
Red Gold is truly a wonderful
variety. It is in a class by it-
self in the spring bearing type.
Everyone who likes strawberries
should by all means have some
Red Gold in their garden.

You will never know the finest
in strawberries till you have
Red Gold.

Postpaid—12 for \$2.00; 25
for \$3.50; 50 for \$6.00; 100
for \$10.00.

ROSE COLLECTION

Special Anniversary Rose Offer
We are offering you selections con-
sisting of three Hybrid Perpetuals,
one Everblooming Tea Rose and two
Ramblers. Making a selection
worthwhile. (No gifts on this
collection.)

George Ahrends—Large pink
flowers. Frau Karl Druschki—
A rose of purest white. Ulrich
Brunner—Extra large,
cherry red color. Golden
Emblem—Clear yellow,
sometimes spotted with
crimson. Dorothy Per-
kins—Dainty double
flowers of shell pink.
Paul's Scarlet Climber.
These six beautiful
roses, postpaid for
\$1.90.

EARLY WONDER TOMATO

The Earliest and Best of All
Extra Early
If you want an early tomato that has
real merit, get Berry's Early Wonder.
Color—Deep, glossy, dark red—a
brilliant red.
Quality—Smooth, finely flavored,
thick meat, small seed cavity,
juicy and sweet.

Yield—The yield is enormous
for an early tomato.
Size—It is simply a colossal
tomato—a mammoth beauty from
every standpoint. 12c; 2
pkts., 20c; 50c; 1 lb.,
Postpaid—Pkt., 12c; 2
pkts., 20c; 50c; 1 lb.,
\$1.75; 1/2 lb., \$3.25; 1 lb., \$6.

The earliest of the extra
early varieties. Ready to the extra
table dainty, crisp, sweet. It is a real
winner with white tip. A leader wherever
grown. We are giving this radish
a prominent display because they
You'll agree that they are as fine
a radish as you ever ate. They
are great. Be sure to buy
All our garden seeds are
tested and guaranteed to grow.
